Abstracts

According to “Global DC-DC Converter Market By Type, By Converter Type, By Power Output, By Application, By Region, Competition Forecast & Opportunities, 2013-2023” DC-DC converter market is forecast to reach nearly \$ 4 billion by 2023. DC-DC converters are high-frequency power conversion circuits that are extensively used for diverse applications in communications, computing, healthcare, instrumentation and industrial equipment sectors. Growing technological advancements, increasing incorporation of power conversion components in electronic devices and rising non-uniformity of power distribution are the key factors anticipated to drive the market growth in the coming years. Moreover, DC-DC converters are expected to witness rising demand from IT storage & networking, transport and telecommunication sectors during the forecast period, globally. Few of the major players operating in the global DC-DC converter market include ABB Ltd., Texas Instruments Incorporated, Telefonaktiebolaget LM Ericsson, Delta Electronics, Inc., Murata Manufacturing Co., Ltd., Infineon Technologies AG, ON Semiconductors, Diodes Incorporated, Fujitsu, and Renesas Electronics Corporation, among others. “Global DC-DC Converter Market By Type, By Converter Type, By Power Output, By Application, By Region, Competition Forecast & Opportunities, 2013-2023” discusses the following aspects of DC-DC converter market globally:

DC-DC Converter Market Size, Share & Forecast

Segmental Analysis – By Type (Isolated Vs. Non-Isolated), By Converter Type

(Buck Converter, Boost Converter, Buck-Boost Converter & Others), By
Power Output, By Application, By Region

Competitive Analysis

Changing Market Trends & Emerging Opportunities

Why You Should Buy This Report?

To gain an in-depth understanding of DC-DC converter in globally

To identify the on-going trends and anticipated growth in the next five years

To help industry consultants, DC-DC converter distributors and other stakeholders align their market-centric strategies

To obtain research-based business decisions and add weight to presentations and marketing material

To gain competitive knowledge of leading market players

To avail 10% customization in the report without any extra charges and get the research data or trends added in the report as per the buyer's specific needs

Report Methodology

The information contained in this report is based upon both primary and secondary research. Primary research included interaction with DC-DC converter distributors and industry experts. Secondary research included an exhaustive search of relevant publications like company annual reports, financial reports and proprietary databases.
