Abstracts

LPG witnessed a strong demand in 2019 and is anticipated to achieve an impressive CAGR of 7 % during the forecast period. Sudden onset of the global pandemic COVID-19 has caused demand for LPG to decrease in Global markets in commercial market however there is increase in consumption of LPG in the household end use due to lockdown. Moreover, the use of LPG in commercial, industrial and transportation is likely to create a strong demand for LPG from 2021-2030.

LPG (Liquefied Petroleum Gas) is compressed gas obtained from the mixture of flammable hydrocarbons such as propane and butane. It is a clean and efficient source of energy widely available to consumers around the world. LPG global market captures country-wise production of LPG and is further segmented into import vs export. The market is further bifurcated into demand and supply, and market share based on consumption by application type usage. Production capacity is being mapped for the top companies in each country yearly. North America is the leading producer of LPG due to rapid expansion of shale gas. USA is the major exporter of LPG to various countries in the world. In the import segment, China is the largest importer of LPG in the world, followed by India. Residential sector accounted for the highest share by application as LPG is primarily used in cooking or household activities. LPG consumption is reportedly the highest in the United States, followed by China.

Years Considered for this Report:
