## Abstracts

LPG is a clean and odorless fuel that emits significantly lesser amount of CO<sub>2</sub> as compared to petrol or diesel. Due to its cost effectiveness and minimal wastage, LPG is being increasingly employed in both commercial and household sectors, worldwide. In addition to its use as a cooking fuel, LPG is utilized as a feedstock in petrochemical plants, food processing plants, metal processing plants, ceramic industries, etc. Consumption of LPG in household segment is surging across the globe, especially in Asia-Pacific region, owing to the region's huge and expanding population base. Rising LPG imports and augmenting demand for cleaner fuel, predominantly by major developing economies such as India and China, is expected to fuel LPG consumption, globally, during the forecast period.

According to TechSci Research report "Global LPG Market By Application, By Region, Competition Forecast & Opportunities, 2012 – 2026", the global LPG consumption is forecast to surpass 380 MMTPA by 2026, majorly on account of increasing government initiatives to boost LPG consumption, surging LPG demand as a cooking fuel, and planned refinery expansions of major petroleum refineries across the globe. In 2016, North America was the largest producer of LPG, and the region's LPG production is expected to further increase through 2026, which can be attributed to continuing growth in development of shale gas reserves in North America. Nevertheless, on the consumption side, Asia-Pacific is expected to continue its dominance as the largest LPG consumer, with the region having accounted for more than one-third of the global LPG consumption in 2016. "Global LPG Market By Application, By Region, Competition

Forecast & Opportunities, 2012 – 2026” discusses the following aspects of global LPG market:

Global LPG Market Size, Share & Forecast

Segmental Analysis – By Application (Household, Commercial, Industrial, Transportation & Others)

Regional Analysis – Asia-Pacific, North America, Europe, Middle East & Africa and South America

Changing Market Trends & Emerging Opportunities

Competitive Landscape & Strategic Recommendations

### Why You Should Buy This Report?

To gain an in-depth understanding of global LPG market

To identify the on-going trends and anticipated growth in the market through 2026

To help industry consultants, LPG companies, distributors and other stakeholders align their market-centric strategies

To obtain research based business decisions and add weight to presentations and marketing material

To gain competitive knowledge of leading market players

To avail 10% customization in the report without any extra charges and get the research data or trends added in the report as per the buyer’s specific needs

### Report Methodology

The information contained in this report is based upon both primary and secondary research. Primary research included interviews with LPG companies, distributors,
