## **Abstracts**

Global magnetic drive pumps market stood at \$ 795.9 million in 2018 and is projected to grow at a CAGR of 5% to reach \$ 1064.9 million by 2024. Magnetic drive pumps have advantages such as minimum leakage, high shelf life and specific usage in applications to avoid emission of poisonous gases which is expected to drive their demand globally. Magnetic drive pumps find application in processing of chemical fluids which are hazardous, corrosive and aggressive to handle. Moreover, growing concern regarding avoiding the leakage of chemical fluids and harm to the workers involved in the production process is further anticipated to fuel demand for magnetic drive pumps in the coming years. However, limitations such as limited solid handling capacity and risk of dry running are some of the challenges for the market.

The market for magnetic drive pumps is segmented on the basis of flow rate, material, application and region. Based on material, the market is categorized into Polypropylene (PP), Polyvinylidene fluoride (PVDF), Stainless Steel and Others. Of all, stainless steel is widely used in magnetic drive pumps due to its properties such as excellent corrosion resistance and high temperature resistance. Magnetic pumps made with stainless steel can withstand against hazardous fluids such as acids, corrosive solvents and brine water.

Based on application, the market is segmented into chemical processing, water

treatment, surface treatment, food processing and others, of which chemical processing dominates the market as magnetic drive pumps are used for transportation of chemicals and its distribution.

Regionally, the market has been segmented as Asia-Pacific, North America, Europe, Middle East & Africa and South America. Among these regions, Asia-Pacific is the largest market for magnetic drive pumps. Expanding manufacturing sector coupled with rising inclination towards energy efficient pumps across various industries such as oil & gas, chemicals, food processing, etc., are propelling demand for magnetic drive pumps across Asia-Pacific.

Some of the key players operating in global magnetic drive pumps market include, Iwaki Co Ltd, Sundyne LLC., Klaus Union, ITT Goulds Pumps Inc, Flowserve Corporation, Ebara Corporation, Xylem Inc, March Manufacturing, Ruhrpumpen Inc., Kirloskar Brothers Limited, among others.
