Abstracts

Methanol witnessed a strong demand in 2019 and is anticipated to achieve an impressive CAGR of X.XX% during the forecast period. Methanol is used in a wide variety of applications in the Construction Industry, Automotive, Electronics, Fuel, Paint and Pharmaceutical Industry. With the onset of Covid-19 in the March 2020, the demand of methanol has shrunk, and the prices are lower in comparison to previous months. The largest manufacturer of methanol, Methanex Corporation has closed its operations and the imports of the methanol from the largest importer of Methanol i.e. China also came to halt due to shutdown of the Methanol producing Industries. But as the impact of Coronavirus on the economy is expected to decrease over the coming months, the demand of methanol is also expected to gain stability.

Methanol is a polar solvent also known as Wood Solvent. It is volatile, colorless and light liquid which has properties similar to Ethanol, but it is more toxic. It is used in the manufacture of fuel, solvent and antifreeze. The use of methanol still remains popular in the manufacture of formaldehyde, MTO (Methanol to Olefins) and Acetic Acid. About 65% of the total methanol is produced by Natural and 35% by Coal. With the rise in pollution, the need for the environment friendly fuel is increasing every year. Methanol is the best alternatives to reduce carbon footprints. Methanol blending is one of the practices that is gaining popularity because it is approximately 240 times safer than Biodiesel.

In comparison to 2015, the demand of methanol in Energy saving applications has reached approximately 45%. Some players have gone for capacity expansions to

accommodate for the sudden surge in Methanol demand in Asia-Pacific. Methanol consumption is reportedly the highest in China and the APAC region was the fastest growing region among all. Methanol's multi-faceted application across several industries is expected to push demand for the product to unprecedented levels during the forecast period.

Years Considered for this Report:

Historical Years: 2015 – 2018

Base Year: 2019

Estimated Year: 2020

Forecast Period: 2021 – 2030

Objective of the Study:

The primary objective of the study was to evaluate and forecast Methanol capacity, production, demand and demand – supply gap globally.

To categorize Methanol demand based on end use, region and sales channel.

To study company shares in Global Methanol market.

To identify major customers of Methanol globally.

To evaluate and forecast Methanol pricing in Global Methanol market.

To identify and profile major companies operating in Global Methanol market.

To identify major news, deals and expansion plans in Global Methanol market.

Global economic slowdown impacted Methanol prices. With the onset of COVID-19, the demand of methanol has decreased that has caused Methanol CFR China price to hover between USD XX/MT to USD XX/MT. Similarly, Methanol prices in Europe and the Americas has weakened in Europe and North America.

Methanex Corporation, Methanol Holdings Trinidad Limited, SABIC, Zagros Petrochemical Co., Yankaung Group Private Limited, OCI Beaumont, Petronas Chemical Group, Mitsubishi Gas Chemical Company, Mitsubishi (MSK) etc., are some of the leading players operating in the Global Methanol market.

To extract data for Global Methanol market, primary research surveys were conducted with Methanol manufacturers, suppliers, distributors, wholesalers and end users. While interviewing, the respondents were also inquired about their competitors. Through this technique, ChemAnalyst was able to include manufacturers that could not be identified due to the limitations of secondary research. Moreover, ChemAnalyst analyzed various end user segments and projected a positive outlook for Global Methanol market over the coming years.

ChemAnalyst calculated Methanol global demand by analyzing the historical data and demand forecast was carried out considering Propylene and crude oil prices. ChemAnalyst sourced these values from industry experts and company representatives and externally validated through analyzing historical sales data of respective manufacturers to arrive at the overall market size. Various secondary sources such as company websites, association reports, annual reports, etc., were also studied by ChemAnalyst.

Key Target Audience:

Methanol manufacturers and other stakeholders

Organizations, forums and alliances related to Methanol distribution

Government bodies such as regulating authorities and policy makers

Market research and consulting firms

The study is useful in providing answers to several critical questions that are important for industry stakeholders, such as Methanol manufacturers, distributors, importers and end users. The report also provides useful insights about which market segments should be targeted over the coming years to strategize investments and capitalize on growth opportunities.

Report Scope:

In this report, the Global Methanol market has been segmented into following categories, in addition to the industry trends which have also been detailed below:

Market, by End Use-Formaldehyde, Methanol to Olefins, DME, Acetic Acid, Other

Market, by Sales Channel-Direct/Institutional Sales, Retail Sales, Other Channel Sales

Market, by Region-North America, APAC, Europe, MEA, South America

Market, by Region:

North America- United States, Mexico, Canada

APAC- China, India, Japan, South Korea, Thailand, Taiwan, Malaysia, Australia

Europe- Germany, France, Russia, Italy, United Kingdom, Spain, Turkey

MEA- Saudi Arabia, UAE, South Africa, Egypt

South America- Brazil, Colombia

Competitive Landscape

Competition Outlook: Outlook of leading 10 players based on product portfolio, market pricing, average selling price, sales footprint, etc.

Company Profiles: Detailed analysis of the major companies operating in the Global Methanol market.

Available Customizations:

With the given market data, ChemAnalyst offers customizations according to a company's specific needs.
