## **Abstracts**

Global peer to peer lending market is valued at around \$ 15 billion in 2018 and the market is poised to grow at CAGR of over 19% to surpass \$ 44 billion by 2024 due to increasing number of borrowers over the past few years. Peer to peer lending market allows borrowers to directly interact with the lender with the P2P lending platform. Use of such platforms helps to reduce costs by excluding operational expenses such as cost of staffing and maintenance, physical branches, among others, which is promoting the growth of the market. Moreover, advancements in the technology and low cost associated with operations is further driving the global peer to peer lending market. Nowadays, increasing student population is preferring loans at cheaper interest rate which is anticipated to promote the growth of peer to peer lending market until 2024. Additionally, increasing awareness pertaining to clearing personal debt as soon as possible is another reason for increased acceptance of peer to peer lending market, globally.

Global peer to peer Lending market can be segmented based on business model and end user. On the basis of end user, the market can be segmented into consumer credit, small business, student loans and real estate. Of all, consumer credit dominates the market; however, small business segment is anticipated to grow at the fastest CAGR during forecast period. Financial institutions are limiting providing loans to small enterprises or business as they would not be able to repay. Peer to peer lending or P2P

market fills this void by offering loans to small business at lower interest rate quickly and efficiently.

Regionally, the market for peer to peer lending is gaining traction and expanding to various regions including Asia-Pacific, North America, Europe, South America and Middle East & Africa. North America is the largest market of the peer to peer lending market due to increasing dependency on the online platform in the region. However, Asia-Pacific peer to peer lending market is anticipated to grow at a rapid pace in the forthcoming years on account of presence of massive student population in developing economies such as Japan and India and increasing number of start-ups and businesses looking for funding for their projects.

The major players operating in the peer to peer lending market include LendingTree, Inc, Lendingclub Corporation, onDeck Capital, Inc., Funding Circle Limited, Prosper Marketplace, Inc., Zopa, Kiva, CommonBond Inc., Upstart Network Inc., CircleBack Lending, Inc. etc. Major companies are developing advanced technologies and decreasing their interest rate in order to stay competitive in the market. Other competitive strategies include mergers & acquisitions and online marketing.
