Abstracts

According To “Global Pipeline Integrity Management Market By Technology, By Application, By Region, Competition Forecast & Opportunities, 2013-2023” pipeline integrity management market is forecast to surpass \$ 10.4 billion by 2023. Anticipated growth in the market can be attributed to growing demand for oil & gas, rising investments in pipeline infrastructure and advancements in the field of integrity management. Moreover, increasing demand from the downstream operations, development of shale gas & synthetic natural gas coupled with rising investments in research & development are further pushing demand for pipeline integrity management across the globe. Additionally, anticipated rise in crude oil prices along with increasing number of pipeline accidents is further likely to steer the global pipeline integrity management market over the next five years. Few of the major players operating in the global pipeline integrity management market include Emerson Electric Co., Baker Hughes, a GE Company, Yokogawa Electric Corporation, Fluor Corporation, Technip FMC PLC, Intertek Group PLC, Bureau Veritas, TUV Rheinland, Pembina Pipeline Corporation, Aker Solutions ASA, and Shawcor Ltd. “Global Pipeline Integrity Management Market By Technology, By Application, By Region, Competition Forecast & Opportunities, 2013-2023” discusses the following aspects of pipeline integrity management market globally:

Pipeline Integrity Management Market Size, Share & Forecast

Segmental Analysis – By Technology (Pigging, Cathodic Protection & Others),

By Application (Upstream, Midstream & Downstream), By Region (North America, Europe, Asia-Pacific, etc)

Competitive Analysis

Changing Market Trends & Emerging Opportunities

Why You Should Buy This Report?

To gain an in-depth understanding of pipeline integrity management market globally

To identify the on-going trends and anticipated growth in the next five years

To help industry consultants, pipeline integrity management distributors and other stakeholders align their market-centric strategies

To obtain research-based business decisions and add weight to presentations and marketing material

To gain competitive knowledge of leading market players

To avail 10% customization in the report without any extra charges and get the research data or trends added in the report as per the buyer's specific needs

Report Methodology

The information contained in this report is based upon both primary and secondary research. Primary research included interaction with pipeline integrity management distributors and industry experts. Secondary research included an exhaustive search of relevant publications like company annual reports, financial reports and proprietary databases.
