Abstracts

According to “Global Smart Grid Cybersecurity Market By Type, By Deployment, By Function, By Solution, By Region, Competition Forecast & Opportunities, 2012 – 2022”, smart grid cybersecurity market is projected to grow at a CAGR of 13% by 2022, backed by increasing number of government initiatives towards modernizing power infrastructure and rising number of cyberattacks on Critical National Infrastructure (CIP) across the globe. Moreover, increasing need for securing Home Area Network (HAN) from cyberattacks, presence of security standards for ensuring privacy and data protection of users, and growing number of connected devices in smart grid network is expected to boost demand for cybersecurity in smart grid infrastructure. Increasing deployment of smart meters and growing complexity of cyberthreats are further anticipated to provide opportunities to cybersecurity companies to target their services towards power companies over the coming years. Global smart grid cybersecurity market is controlled by these major players, namely, BAE Systems plc, International Business Machines Corporation, CISCO SYSTEMS, INC., McAfee, LLC, Symantec Corporation, Siemens AG, N-Dimension Solutions Inc., Leidos Holdings, Inc., AlertEnterprise Inc., and AlienVault Inc., among others. “Global Smart Grid Cybersecurity Market By Type, By Deployment, By Function, By Solution, By Region, Competition Forecast & Opportunities, 2012 – 2022”, discusses the following aspects of smart grid cybersecurity market globally:

Smart Grid Cybersecurity Market Size, Share & Forecast

Segmental Analysis – By Type (Network Security, Endpoint Security, Application Security & Database Security), By Deployment (On-Premise & Cloud), By Function, By Solution, By Region

Competitive Analysis

Changing Market Trends & Emerging Opportunities

Why You Should Buy This Report?

To gain an in-depth understanding of smart grid cybersecurity market globally

To identify the on-going trends and anticipated growth in the next five years

To help industry consultants, electric two-wheeler manufacturers, distributors and other stakeholders align their market-centric strategies

To obtain research-based business decisions and add weight to presentations and marketing material

To gain competitive knowledge of leading market players

To avail 10% customization in the report without any extra charges and get the research data or trends added in the report as per the buyer's specific needs

Report Methodology

The information contained in this report is based upon both primary and secondary research. Primary research included interaction with smart grid cybersecurity manufacturers, distributors and industry experts. Secondary research included an exhaustive search of relevant publications like company annual reports, financial reports and proprietary databases.
