Abstracts

Global sneakers market stood at \$ 58 billion in 2018 and is projected to grow at a CAGR of over 7% during 2019-2024 to surpass \$ 85 billion by 2024, on account of increasing participation of the young population in sports and fitness activities and growing consumer inclination towards branded and high-fashion footwear. Sneakers are shoes primarily designed for sports or other forms of physical exercise. However, they are being used for everyday wear as well.

Different sales channels and rising importance of internet retailing is adding impetus to global sneakers market. Globally, sales of sneakers are also being pushed by a sneaker's identification with a specific athlete. Sneakers have been part of the American culture; however, they have successfully implanted their presence across the world. Sneakers are in huge demand among people, especially from the younger age group.

In terms of type, global sneakers market has been categorized into adult sneakers and children sneakers. The adult sneakers segment dominated the market in 2018 and is expected to maintain its market dominance in the coming years as well, on account of growing fashion consciousness among adults. Moreover, increasing participation of the young population in sports and fitness activities is anticipated to further aid the adult sneakers segment, globally.

North America accounted for the largest share in global sneakers market in 2018, owing to growing health-consciousness and need for physical fitness. Among the North American countries, the sneakers market was the largest in the US. With changing

lifestyle, consumers in the US prefer comfort over price, as a result, demand for sneakers is increasing across the country. Additionally, easy availability of innovative and customized sneakers is boosting the region's sneakers market.
