Abstracts

The global stent market is expected to witness a significant growth of USD25869.21 million by 2026, with a CAGR of 7.92% during the forecast period owing to spike in the number of cardiovascular surgeries around the world coupled with the growing adoption of minimally invasive techniques. The increase in adoption of sedentary lifestyle and growing consumption of suboptimal diets are also acting as stimulating factors for the global stent market growth. Moreover, increasing advances in the field of interventional cardiology and introduction of innovative technologies are anticipated to fuel the market growth in coming years.

A stent is basically a tiny tube that is inserted into a blocked passageway to keep it open. It restores the flow of blood or other fluids, depending on where it is placed. Stents can be very useful to prevent aneurysms from rupturing in the brain, aorta, or other blood vessels of a human body. With the increasing number of people being diagnosed with coronary heart diseases, the global stent market is predicted to grow substantially during the forecast period. However, complications relating to stent implantation are expected to hamper the market growth.

Global stent market can be segmented based on product type, material type, type, end user and region. Based on product type, the market can be segmented into vascular stents (coronary vascular stents, peripheral vascular stents and neurovascular stents) and non-vascular stents. Among them, coronary vascular stents accounted for the largest market share in 2020 and non vascular stents are expected to grow the fastest during the forecast period owing to increasing number of percutaneous coronary intervention (PCI) procedures. According to material type, metallic biomaterials are the dominating type because of their maximum use in the base structure. However, polymeric biomaterials are expected to grow in the near future. Based on the stent type, balloon-expandable stents are the most widely used. According to the end user, hospitals and clinics dominate the market owing to the maximum surgical stenting operations taking place.

Regionally, Asia Pacific is anticipated to witness the fastest growth through 2026 owing to a large patient pool suffering from cardiovascular disorders. Also, governments in various economies are taking initiatives to provide affordable treatment options, which is anticipated to drive the growth of the global stent market in the region.

Major companies operating in the global stent market include Boston Scientific Corporation, Abbott Laboratories, Inc., Medtronic PLC, B. Braun Melsungen AG, Becton, Dickinson, and Company, Stentys S.A., Biotronik SE & Co. KG, Elixir Medical Corporation, MicroPort Scientific Corporation and Terumo Corporation. The market players are adopting growth strategies such as new product launches, mergers and acquisitions to strengthen their position in the global market.

Years considered for this report:

Historical Years: 2016-2019

Base Year: 2020

Estimated Year: 2021

Forecast Period: 2022-2026

Objective of the Study:

To analyze the historical growth in the market size of the global stent market from 2016 to 2020.

To estimate and forecast the market size of the global stent market from 2021 to 2026 and growth rate until 2026.

To classify and forecast global stent market based on product type, material type, type, end user, company, and regional distribution.

To identify drivers and challenges for the global stent market.

To examine competitive developments such as expansions, new product launches, mergers and acquisitions, etc., in the global stent market.

To conduct pricing analysis for the global stent market.

To identify and analyze the profile of leading players operating in the global stent market.

TechSci Research performed both primary as well as exhaustive secondary research for this study. Initially, TechSci Research sourced a list of major diagnostic players and hospital chains operating across the globe. Subsequently, TechSci Research conducted primary research surveys with the identified companies. While interviewing, the respondents were also enquired about their competitors. Through this, TechSci Research was able to include manufacturers which could not be identified due to the limitations of secondary research.

TechSci Research calculated the market size of the global stent market using a bottom-up approach, wherein data for various end user segments was recorded and forecast for the future years. TechSci Research sourced these values from the industry experts and company representatives and externally validated through analyzing historical data of these product types and applications for getting an appropriate, overall market size. Various secondary sources such as company websites, news articles, press releases, company annual reports, investor presentations and financial reports were also studied by TechSci Research.

Key Target Audience:

Stent manufacturers, companies/partners, hospitals pharmacy/retail pharmacy and other stakeholders

Government bodies such as regulating authorities and policy makers

Organizations, industry associations, forums and alliances related to stent

Market research and consulting firms

The study is useful in providing answers to several critical questions that are important for the industry stakeholders such as stent manufacturing companies, end users etc., besides allowing them in strategizing investments and capitalizing on market opportunities.

Report Scope:

In this report, the global stent market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

Global Stent Market, By Product Type:

Coronary Vascular Stents

Non Vascular Stents

Peripheral Vascular Stents

Neurovascular Stents

Global Stent Market, By Material Type:

Metallic Biomaterials

Polymeric Biomaterials

Natural Biomaterials

Global Stent Market, By Type:

Self-Expandable Stents

Balloon-Expandable Stents

Global Stent Market, By End User:

Hospitals & Clinics

Ambulatory Care Centres

Others

Global Stent Market, By Region:

North America

United States

Canada

Mexico

Europe

Germany

France

United Kingdom

Italy

Spain

Asia Pacific

Japan

China

India

South Korea

Australia

South America

Argentina

Brazil

Colombia

Middle East & Africa

Saudi Arabia

UAE

South Africa

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in the global stent market.

Available Customizations:

With the given market data, TechSci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

Company Information

Detailed analysis and profiling of additional market players (up to five).
