Abstracts

Three-wheelers are serving as an important mode of passenger and load transportation, especially in inter-city transportation, across various developing countries. Passenger carrier three-wheelers are considered as the most economical and efficient mode of intra-city transportation, especially in rural and semi-urban regions of various developing countries across Asia, Africa and Latin America. Over the last five years, robust growth in Small and Medium Enterprises (SMEs) in developing nations has been fueling growth in the global load carrier three-wheelers market. Globally, demand for three-wheelers is further being boosted by increasing penetration of hub-n-spoke model in supply chain network of various enterprises.
