Abstracts

According to “Global Virtual Pipeline and Plug-and-Play CNG System Market By Application, By Container Size, By Region, Competition Forecast & Opportunities, 2013 – 2023” virtual pipeline and plug-and-play CNG system market is forecast to grow to over \$ 741 million by 2023. Anticipated market growth can be attributed to growing production of natural gas and its use in transportation, industrial and residential sectors, which in turn boosts the use of natural gas in virtual pipeline and plug-and-play CNG systems, globally. Some of the other factors that would push the market are increasing investments in research & development activities, expansion in city gas distribution network and aging natural gas infrastructure in North America and Europe. Over the coming years, demand for virtual pipeline and plug-and-play CNG systems is expected to increase significantly in the transportation sector, owing to growing government regulations for emission control. Few of the major players operating in global virtual pipeline and plug-and-play CNG system market are General Electric, Galileo Technologies S.A., Wartsila, Linde AG, Siemens AG, Eni S.p.A., Honeywell International Inc., Broadwind Energy, Inc., Global Partners LP and Luxfer Gas Cylinders. “Global Virtual Pipeline and Plug-and-Play CNG System Market By Application, By Container Size, By Region, Competition Forecast & Opportunities, 2013 – 2023” discusses the following aspects of Virtual Pipeline and Plug-and-Play CNG System market globally:

Virtual Pipeline and Plug-and-Play CNG System Market Size, Share & Forecast

Segmental Analysis – By Application (Transportation, Industrial, Residential & Others), By Container Size (Type I, Type II, Type III & Type IV), By Region

Competitive Analysis

Changing Market Trends & Emerging Opportunities

Why You Should Buy This Report?

To gain an in-depth understanding of Virtual Pipeline and Plug-and-Play CNG System globally

To identify the on-going trends and anticipated growth in the next five years

To help industry consultants, Virtual Pipeline and Plug-and-Play CNG System distributors and other stakeholders align their market-centric strategies

To obtain research-based business decisions and add weight to presentations and marketing material

To gain competitive knowledge of leading market players

To avail 10% customization in the report without any extra charges and get the research data or trends added in the report as per the buyer's specific needs

Report Methodology

The information contained in this report is based upon both primary and secondary research. Primary research included interaction with Virtual Pipeline and Plug-and-Play CNG System distributors and industry experts. Secondary research included an exhaustive search of relevant publications like company annual reports, financial reports and proprietary databases.
