Abstracts

Growing automobile industry and increasing vehicles production as well as sales are few of the major factors aiding India automotive bearings market. India automobile production grew at a CAGR of over 4%, in volume terms, during 2011-2015. Moreover, the country's automotive industry contributes more than 20% to India's manufacturing GDP. Automobile production in India is anticipated to grow at a robust pace in the coming years as well, and thereby is expected to boost demand for automotive bearings from both OEM as well as replacement market in the next five years. Expanding fleet size of two-wheelers, passenger cars and three wheelers is anticipated to fuel demand for automotive bearings in the next five years. Moreover, with favorable inflationary scenario, expanding middle class population and increasing national disposable income, automobile sales across all the automobile segments are expected to grow in the coming years, thereby positively influencing India automotive bearings market.

According to "India Automotive Bearings Market, By Type, By Vehicle Type, Competition Forecast & Opportunities, 2011 – 2021", the automotive bearings market in India is anticipated to cross \$2.3 Billion by 2021, on account of expanding fleet size and growing replacement market demand. Two-Wheeler occupied the largest share in India automotive bearings market in 2015. The segment is anticipated to maintain its dominance during the forecast period as well, owing to growing motorcycle and scooters production and sales in the country. Deep groove ball bearing angular is the most preferred type of automotive bearings in India. Region-wise, north region is the largest demand generating region for automotive bearings in the country. "India

Automotive Bearings Market, By Type, By Vehicle Type, Competition Forecast & Opportunities, 2011 – 2021” discusses the following aspects of India automotive bearings market:

India Automotive Bearings Market Size, Share & Forecast

Segmental Analysis – By Type (Deep Groove Ball Bearing Angular, Tapered Roller Bearing, Spherical Roller Bearing, Cylindrical Roller Bearing, Needle Roller Bearing, Angular Contact Ball Bearing, Thrust Ball Bearing & Thrust Roller Bearing), By Vehicle Type (Two-Wheeler, Passenger Car, Off-the-Road, Light Commercial Vehicle, Three-Wheeler & Medium & Heavy Commercial Vehicle), By Region, By Demand Category (OEM Vs. Replacement)

Policy & Regulatory Landscape

Changing Market Trends & Emerging Opportunities

Competitive Landscape & Strategic Recommendations

Why You Should Buy This Report?

To gain an in-depth understanding of India automotive bearings market

To identify the on-going trends and anticipated growth in the next five years

To help industry consultants, automotive bearings manufacturers, vendors, dealers other stakeholders align their market-centric strategies

To obtain research based business decisions and add weight to presentations and marketing material

To gain competitive knowledge of leading market players

To avail 10% customization in the report without any extra charges and get research data or trends added in the report as per the buyer's specific needs

Report Methodology

India Automotive Bearings Market, By Type (Deep Groove Ball Bearing Angular, Tapered Roller Bearing, Spherical...

The information contained in this report is based upon both primary and secondary research. Primary research included interaction with automotive bearings manufacturers, channel partners and industry experts. Secondary research included an exhaustive search of relevant publications like company annual reports, financial reports and proprietary databases.
