India automotive voltage regulator market is expected to reach 30 million units by FY2025. Automotive voltage regulator is a device which regulates the voltage produced by automotive alternator to protect electrical circuits and different components of a vehicle like, wiring system, lights, motors that drive power accessories. Automotive voltage regulator is a critical device in a vehicle for providing all type of advanced mechanisms like, stability control system, camera system for parking, various sensors for better safety features, tire pressure monitoring system, as all these advanced features requires uniform voltage supply for smooth functioning. Continuous advancements in technology and introduction of several smart features like, smart fuel saving tips, enhanced gesture control, integration with smartphones in vehicles, require uniform voltage supply, which is leading to growing adoption of automotive voltage regulators in India.

India automotive voltage regulator market is segmented in vehicle type, functionality type and regional distribution. Based on the vehicle type, Indian automotive voltage regulator market can be classified into PC, LCV, M&HCV and two-wheeler. Two-wheeler is the dominant vehicle type in 2019 and is expected to continue its leading position in the coming years as well mainly due to increase in two-wheeler sales and growing demand from youth population.

In terms of regional analysis, market can be segmented into North, South, East and West. Western India dominates the India voltage regulator market, followed by Southern, Northern and Eastern region. This is because of most of the automotive companies have their manufacturing plants in western part of India and the sales of vehicles in western part are also high. Major players operating in Indian automotive voltage regulator market includes UNO Minda, Valeo, Denso, TVS Lucas, Mitsubishi Electric Automotive India Pvt. Ltd., etc.
