## Abstracts

Azo dyes are dyes with -N=N- azo structure as a chromophore. Yellow, orange and red are some of the most common colors imparted by azo dyes. They are extensively used in fabric dyeing process owing to their excellent fastness properties and ability to impart high intensity and bright colours. On account of ease of manufacturing and low production cost, majority of commercial dyes belong to this class. By means of performing different kinds of alterations to the azo dye's chemical structure, a broad range of azo dyes can be produced, which can be used in industries such as textile, paints & coatings, etc.
