## **Abstracts**

India Bisphenol S demand stood at 2.08 Thousand Tonnes in FY2021 and is forecast to reach 16.73 Thousand Tonnes by FY2030, growing at a healthy CAGR of 26.09% until FY2030. India is a net exporter of BPS as its domestic capacity is enough to cater to the rising export demands. India exports diphenyl sulphone and BPS to the USA, Germany, Belgium, and Taiwan. Domestically, most of the Bisphenol S demand comes from thermal paper consumption in POS billing machines and food and beverage labeling. India diphenyl sulphone and BPS-based dyes & dye intermediates market is expected to witness further high year-on-year growth due to increasing domestic consumption of textile and leather products and exports of high-quality textile products from India. This growth in textile products consumption is encouraging dyes and dye intermediate manufacturers to increase their production capacities, to cater to the growing demand. The growing construction sector in India is responsible for the growth in the consumption of epoxy resins thereby increasing the demand for Bisphenol S.

COVID-19 pandemic had a severe impact on the market, in general, and disrupted the economy. Rising number of patients suffering from the infection and rapidly evolving virus created death scare for the whole population at large. The government imposed the lockdown to contain the spread of the virus that further resulted in disabling market growth. The manufacturing units were closed for a significant amount of time, and it disturbed the distribution channels. The government is slowly controlling the consequences, and steadily market is regaining its composure. With a steady CAGR in the upcoming forecast years, the market may grow and present as a potential investment for the new market player that supports the market growth in the future.
