Abstracts

Butadiene demand in India stood at 324 KTPA in 2018 and is projected to cross 483 KTPA by 2030. The properties of butadiene such as solubility in alcohol & ether and insolubility in water makes it useful for manufacturing various synthetic rubbers such as PBR, SBR and nitrile butadiene rubbers. Rising demand for tires in the automotive industry and increasing demand for paints & adhesives in the construction industry is expected to spur demand for butadiene during the forecast period. Growing preference for butadiene in production of carpets, engineering plastics and nylon clothing is expected to further boost demand for butadiene in the coming years.
