Abstracts

According to “India Pollution Mask Market By Type, By Filter Type, By Usage, By Distribution Channel, Competition Forecast & Opportunities, 2013 – 2023”, India pollution mask market is projected to grow at a CAGR of more than 18% by 2023, on the back of growing health concerns due to deteriorating air quality in the country, especially across the urban areas. Increasing CO₂ emissions due to surging industrial activity and expanding vehicle fleet, rising sales of pollution masks through online channels and intensifying competition are some of the other factors expected to boost pollution masks market in the country over the course of next five years. Moreover, increasing per capita expenditure on healthcare and safety products and rising consumer awareness regarding respiratory diseases and benefits of anti-pollution products are anticipated to fuel demand for pollution masks in India in the coming years. “India Pollution Mask Market By Type, By Filter Type, By Usage, By Distribution Channel, Competition Forecast & Opportunities, 2013 – 2023” discusses the following aspects of pollution mask market in India:

Pollution Mask Market Size, Share & Forecast

Segmental Analysis – By Type (Disposable Vs. Replaceable/Re-usable), By Filter Type (Particulate Filter, Gas & Odor Filter & Combination Filter), By Usage, By Distribution Channel

Competitive Analysis

Changing Market Trends & Emerging Opportunities

Why You Should Buy This Report?

To gain an in-depth understanding of pollution mask market in India

To identify the on-going trends and anticipated growth in the next five years

To help industry consultants, pollution mask manufacturers, distributors and other stakeholders align their market-centric strategies

To obtain research based business decisions and add weight to presentations and marketing material

To gain competitive knowledge of leading market players

To avail 10% customization in the report without any extra charges and get the research data or trends added in the report as per the buyer's specific needs

Report Methodology

The information contained in this report is based upon both primary and secondary research. Primary research included interaction with pollution mask manufacturers, distributors and industry experts. Secondary research included an exhaustive search of relevant publications like company annual reports, financial reports and proprietary databases.
