## Abstracts

Sulphuric acid demand in India is projected to reach 25,391 thousand tonnes by 2030, on account of increasing consumption of phosphate fertilizers across the country. Moreover, growing sulphuric acid use across various applications such as Phosphoric Acid for DAP/ NP/NP, Single Super Phosphate, Linear Alkyl Benzene Sulfonate, Dye Intermediates and Ammonium Sulfate is expected to drive the sulphuric acid market during the forecast period. India has a large number of sulphuric acid manufacturers that use sulphuric acid for captive consumption to manufacture phosphate fertilizers and synthesize complex chemicals, reflecting positive growth patterns in the utilization rate of sulphuric acid in India. Additionally, the Asian country has a strong manufacturing base for the production of phosphate fertilizers, which necessitates requirement for sulphuric acid.
