Abstracts

According to “India Textile Chemicals Market By Type, By Process Type, By Textile Type, By Sales Channel, By End Use, Competition, Forecast & Opportunities, 2013 – 2023” textile chemicals market stood at \$ 1.5 billion in 2017 and is projected to grow at a CAGR of around 10% to reach \$ 2.6 billion by 2023, on the back of growing demand for high-quality finished textile products. Stringent environmental regulations imposed in China against pollution have forced several Chinese textile dye manufacturers to discontinue their operations, thereby resulting in opportunities for Indian players to further penetrate the international market. India is the second largest textile exporter in the world and the state government of Maharashtra is taking initiatives to establish around nine textile parks, which is expected to encourage domestic textile manufacturing, which in turn is anticipated to spur the demand for textile chemicals in India in coming years. Some of the major players operating in India textile chemicals market are Bodal Chemicals Ltd., Kiri Industries Ltd., Archroma India Pvt. Ltd., Croda India Company Pvt. Ltd., Huntsman International (India) Pvt. Ltd., Jaysynth Dyestuff (India) Ltd., CHT India Pvt. Ltd., Rossari Biotech Ltd., Indofil Industries Ltd. and Fibro Organic (India) Pvt.
