Abstracts

Italy LPG industry demand stood at 4.42 Million Tonnes in 2020 and is forecast to reach 8.73 Million Tonnes by 2030, growing at a healthy CAGR of 6.78% until 2030. LPG demand in Italy has been strongly driven by the autogas sector which holds more than 40% share in the Italian LPG market. Being one of the largest European markets for automotive in 2019, the Italian LPG industry is estimated to grow remarkably in the forecast period. Italy has the second-largest Autogas market in Europe after Poland and the sixth-largest in the world. Due to the onset of COVID-19, the demand from residential sectors faced a setback owing to the temporary closure of the end-user industries. The disruptions in the supply chain due to the strict restrictions imposed by the leading authorities are expected to hinder the market growth. However, huge demand from the residential sector is fueling the market growth in this period.
