Abstracts

Japan LPG market demand stood at 16.52 Million Tonnes in FY2021 and is forecast to reach 27.67 Million Tonnes by FY2030, growing at a healthy CAGR of 5.58% until FY2030. The household and commercial sectors account for a majority share of Japan's LPG annual consumption. As of FY18, LPG was being used in almost 25 million homes across the country for cooking and heating as well as in about 210,000 taxis running on the road. Moreover, Japan is discovering the potential of LPG fuel in the marine fuel sector as a new source of growth. Since the onset of COVID-19, the market suffered from a setback as the demand declined from the industrial and commercial sectors. Restrictions on import and export coupled with trade barriers put up by the leading authorities contributed to the restrain the market growth. Demand from the residential sector witnessed a boost owing to the presence of lockdown restrictions and curfew in the region.
