Abstracts

Japan Phenol market demand stood at 533.6 Thousand Tonnes in FY2021 and is forecast to reach 851.7 Thousand Tonnes by FY2030, growing at a healthy CAGR of 5.00% until FY 2030. Japan is one of the world's largest exporter and producer of Phenol which is the key precursor for Bisphenol A (BPA), an important raw material for polycarbonate. Polycarbonates are used in a variety of applications, such as optical disks and car components. The surge in demand for Phenol for making Phenolic resins and Nylon products is further propelling the overall market growth. The COVID-19 outbreak affected the market growth adversely as the major manufacturing units and end-user industries were temporarily shut down to contain the spread of novel coronavirus. Disruption in the supply chain was observed which further negatively impacted the market growth. With imposed new regulations of the COVID-19 and proper precautions, the market is anticipated to regain its growth in the years to come.
