Abstracts

Japan plastic recycling market stood at 8.54 Million Tonnes in FY2021 and is forecast to reach 11.72 Million Tonnes by FY2030, growing at a healthy CAGR of 3.58% until FY2030. Japan claims to have an 84 percent recycle ratio of its collected plastic waste. Japan recycles plastic waste through three methods i.e., chemical, material, and thermal. In the chemical method, the plastic waste is broken into constituent components; material recycling means plastic is recycled and reprocessed into a new bottle, while thermal means plastic is burned in incinerators to generate energy. Japan has been promoting and practicing policies related to waste management since 2000 such as 3R, enhancement of illegal dumping regulations, industrial waste management, etc. These factors are likely to have a positive impact on the plastic recycling market. Besides, Japan has introduced Home Appliances Recycling Law, Automobile Recycling Law, Small Home Appliance Recycling Law, waste recycle collection model and implemented them across the country to collect plastic waste, which is also stimulating the demand for plastic recycling market in Japan. The COVID-19 pandemic sparked a rush for plastic due to its extensive use in industries such as packaging, foods & beverages, healthcare, pharmaceutical, etc. However, the inappropriate disposal of plastic during the challenging times due to lack of labor, lockdown measures, etc. affected the plastic recycling market drastically.

Under this subscription, you would be able to access Japan Plastic Recycling market demand and supply analysis on a cloud-based platform for one year. The data is updated on a near real-time basis to add any new movement in the industry including, but not limited to new plant announcements, plant shutdowns, temporary disruptions in

demand or supply, news and deals, and much more specific to Plastic Recycling.

Years Considered for Analysis:

Historical Years: FY2015 – FY2019

Base Year: FY2020

Estimated Year: FY 2021

Forecast Period: FY 2022 – FY2030

This report will be delivered on an online digital platform with a one-year subscription and quarterly update.

Deliverables

Installed Capacity By Company-Installed capacity within the country along with the individual capacity of leading players

Installed Capacity By Location-Installed capacity at several locations across the country

Production By Company-Actual production done by different companies

Operating Efficiency By Company-Operating efficiency at which different companies are operating their plants

Demand By End Use-Demand/Sale of Plastic Recycling in different end-user industries across the country

Demand By Sales-Channel Demand/Sale of Plastic Recycling by different sales channels across the country

Demand By Region-Demand/Sale of Plastic Recycling in different regions of the country

Country Wise Exports-Exports of Plastic Recycling by Different Countries

Country Wise Imports-Imports of Plastic Recycling by Different Countries

Demand & Supply Gap-Demand & Supply Gap at country level

Market Share of Leading Players-Revenue shares of leading players in the country

News & Deals-Historical & Current News & Deals in the Plastic Recycling market

To extract data for the Japan Plastic Recycling market, the ChemAnalyst team conducts primary research surveys with Plastic Recycling manufacturers, suppliers, distributors, wholesalers, and customers, followed by exhaustive secondary research to cross validate the information being collected through primary research surveys.

Contents

1. JAPAN PLASTIC RECYCLING MARKET OUTLOOK, 2015-2030

- 1.1. Capacity By Company
- 1.2. Capacity By Location
- 1.5. Production By Company
- 1.6. Operating Efficiency By Company
- 1.7. Country-Wise Import
- 1.8. Country-Wise Export
- 1.9. Demand-Supply Gap

2. JAPAN PLASTIC RECYCLING DEMAND OUTLOOK, 2015-2030

- 2.1. By End Use
- 2.2. By Application
- 2.3. By Sales Channel (Direct/Institutional Sales, Retail Sales, Other Channel Sales)
- 2.4. By Region
- 2.5. By Company Share of Leading Players

3. NEWS & DEALS
