

# Japan Tappet Market By Type (Flat, Roller), By Engine Capacity (6 Cylinders), By Vehicle Type (Passenger Cars, Commercial Vehicle), By Distribution Channel (OEM, Replacement), By Region, Competition, Opportunities & Forecast, 2020-2030F

<https://marketpublishers.com/r/J8FD0C3E0AC1EN.html>

Date: August 2025

Pages: 85

Price: US\$ 3,500.00 (Single User License)

ID: J8FD0C3E0AC1EN

## Abstracts

### Market Overview:

Japan Tappet Market was valued at USD 544.95 Million in 2024 and is expected to reach USD 681.62 Million by 2030 with a CAGR of 3.80% during the forecast period. The Japan tappet market is witnessing a progressive transformation, driven by continuous advancements in automotive engine technologies and the pursuit of improved fuel efficiency. The tappet, an essential component in internal combustion engines, plays a critical role in ensuring accurate valve operation, which directly influences engine performance. As automakers focus on downsizing engines while maintaining or enhancing power output, the demand for precision-engineered tappets is rising. Hydraulic tappets are gaining traction due to their ability to reduce noise, eliminate the need for manual adjustments, and improve overall engine efficiency. Increasing consumer expectations for quieter and smoother engines have encouraged OEMs to integrate advanced tappet systems across various vehicle models, enhancing the market's growth momentum.

Manufacturers are investing in lightweight and durable materials such as chromium steel and advanced alloys to reduce tappet wear and optimize engine performance under high-temperature and high-pressure conditions. This evolution in tappet materials and designs has opened opportunities for innovation and product differentiation. Moreover, the shift towards hybrid powertrains and fuel-efficient vehicles is further influencing tappet design to accommodate more compact and integrated engine

architectures. The emphasis on stricter emission norms has led to the development of tappets that support variable valve timing and other advanced valvetrain mechanisms, contributing to reduced emissions and improved fuel consumption. These trends are reinforcing the need for technologically advanced and reliable tappet systems in modern automotive applications. For instance, The Japan tappet market is bolstered by robust automotive production and export performance. Between April 2023 and March 2024, Japan produced approximately 7.55 million passenger cars, marking a 10.7% year-over-year increase from 6.81 million units. This uptick in production directly supports the demand for engine components like tappets. Despite the growth drivers, the tappet market faces several challenges, including rising cost pressures and high competition among component suppliers. Manufacturers are under continuous pressure to maintain quality while managing production costs, especially as raw material prices fluctuate. The growing complexity of engine systems also demands higher precision in tappet manufacturing, which increases production time and investment in quality assurance.

## Market Drivers

### Surge in Automotive Production

The expansion of the automotive industry significantly propels the demand for tappets. As vehicle production escalates, particularly in emerging economies, the need for efficient engine components like tappets rises correspondingly. Tappets are integral to the valve train system, ensuring optimal engine performance. The increase in vehicle manufacturing, driven by urbanization and rising disposable incomes, directly influences the growth of the tappet market. More advanced manufacturing processes now support high-volume production of tappets with consistent quality. Consumer preference for performance-oriented vehicles boosts the need for high-precision components. The increase in ICE-powered vehicle launches further sustains tappet demand. Growing demand in both OEM and replacement markets strengthens long-term opportunities. For instance, Japan exported 4.05 million passenger cars during the same period, up from 3.38 million the previous year, reflecting a 19.8% increase. The United States was the largest market, with exports valued at \$41.07 billion, followed by Australia at \$8.21 billion and China at \$6.61 billion. These figures underscore the strength of Japan's automotive sector, which is integral to the tappet market's growth.

## Key Market Challenges

### Transition to Electric Vehicles (EVs)

The automotive industry's shift towards electric vehicles poses a significant challenge to the tappet market. EVs operate without internal combustion engines, eliminating the need for tappets. As EV adoption grows, the demand for traditional engine components like tappets is expected to decline, impacting market growth. Long-term ICE investment may shrink as OEMs pivot to electrification. Governments incentivizing EV sales amplify tappet obsolescence. EV drivetrains require different component ecosystems. Suppliers face decisions on diversifying or phasing out tappet-related portfolios. Tappet manufacturers must now rethink their business models and explore adjacent markets, such as precision components for EV systems. Some suppliers are experimenting with thermal management solutions and hybrid-compatible parts to mitigate volume loss. The pace of EV adoption directly influences long-term viability for tappet-centric production lines. Strategic partnerships and adaptive capacity planning have become essential to withstand this disruptive transition.

## **Key Market Trends**

### **Rise in Lightweight Tappet Materials**

There is growing emphasis on reducing vehicle weight to improve fuel efficiency and performance. This has led to the use of lightweight materials such as aluminum alloys and composite materials in tappet production. These lighter tappets reduce the inertia in the valve train, enhancing throttle response and engine speed capability. OEMs are exploring titanium-based variants for ultra-lightweight performance. Weight reduction aligns with emissions and mileage targets. Material innovation is often paired with process advancements. High-speed machining of lightweight materials reduces cycle time. Lightweight tappets also reduce valvetrain noise due to decreased impact forces. The switch to low-density metals improves engine start-up characteristics. Engineers are working on balancing mechanical strength with lower mass without compromising heat resistance. This trend supports sustainability goals by minimizing resource consumption and energy use during production.

## **Key Market Players**

Otics Corporation

NSK Ltd.

Schaeffler AG

Federal-Mogul LLC.

Rane Engine Valve Limited

Wuxi Xizhou Machinery Co. Ltd.

AC Delco

TRW

Competition Cams, Inc.

SKF

### **Report Scope:**

In this report, the Japan Tappet Market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

Japan Tappet Market, By Type:

Flat

Roller

Japan Tappet Market, By Engine Capacity:

oO4 Cylinders

4–6 Cylinders

>6 Cylinders

Japan Tappet Market, By Vehicle Type:

Passenger Cars

Commercial Vehicle

Japan Tappet Market, By Distribution Channel:

OEM

Replacement

Japan Tappet Market, By Region:

Hokkaido & Tohoku

Kanto

Chubu

Kansai

Chugoku

Shikoku

Kyushu

## **Competitive Landscape**

Company Profiles: Detailed analysis of the major companies presents in the Japan Tappet Market.

## **Available Customizations:**

Japan Tappet Market report with the given market data, TechSci Research offers customizations according to the company's specific needs. The following customization options are available for the report:

## **Company Information**

Detailed analysis and profiling of additional market players (up to five).

*Japan Tappet Market By Type (Flat, Roller), By Engine Capacity (<4 Cylinders, 4–6 Cylinders, >6 Cylinders), By...*

## Contents

### 1. INTRODUCTION

- 1.1. Research Tenure Considered
- 1.2. Market Definition
- 1.3. Scope of the Market
- 1.4. Markets Covered
- 1.5. Years Considered for Study
- 1.6. Key Market Segmentations

### 2. RESEARCH METHODOLOGY

- 2.1. Objective of the Study
- 2.2. Baseline Methodology
- 2.3. Key Industry Partners
- 2.4. Major Association and Secondary Sources
- 2.5. Forecasting Methodology
- 2.6. Data Triangulation & Validation
- 2.7. Assumptions and Limitations

### 3. EXECUTIVE SUMMARY

- 3.1. Overview of the Market
- 3.2. Overview of Key Market Segmentations
- 3.3. Overview of Key Regions/Countries

### 4. JAPAN TAPPET MARKET OUTLOOK

- 4.1. Market Size & Forecast
  - 4.1.1. By Value
- 4.2. Market Share & Forecast
  - 4.2.1. By Type Market Share Analysis (Flat, Roller)
  - 4.2.2. By Engine Capacity Market Share Analysis (6 Cylinders)
  - 4.2.3. By Vehicle Type Market Share Analysis (Passenger Cars, Commercial Vehicle)
  - 4.2.4. By Distribution Channel Market Share Analysis (OEM, Replacement)
  - 4.2.5. By Region Market Share Analysis
  - 4.2.6. By Top 5 Companies Market Share Analysis, Others (2024)
- 4.3. Market Map

## **5. HOKKAIDO & TOHOKU TAPPET MARKET OUTLOOK**

### 5.1. Market Size & Forecast

#### 5.1.1. By Value

### 5.2. Market Share & Forecast

#### 5.2.1. By Type Share Analysis

#### 5.2.2. By Engine Capacity Market Share Analysis

#### 5.2.3. By Vehicle Type Market Share Analysis

#### 5.2.4. By Distribution Channel Market Share Analysis

## **6. KANTO TAPPET MARKET OUTLOOK**

### 6.1. Market Size & Forecast

#### 6.1.1. By Value

### 6.2. Market Share & Forecast

#### 6.2.1. By Type Share Analysis

#### 6.2.2. By Engine Capacity Market Share Analysis

#### 6.2.3. By Vehicle Type Market Share Analysis

#### 6.2.4. By Distribution Channel Market Share Analysis

## **7. CHUBU TAPPET MARKET OUTLOOK**

### 7.1. Market Size & Forecast

#### 7.1.1. By Value

### 7.2. Market Share & Forecast

#### 7.2.1. By Type Share Analysis

#### 7.2.2. By Engine Capacity Market Share Analysis

#### 7.2.3. By Vehicle Type Market Share Analysis

#### 7.2.4. By Distribution Channel Market Share Analysis

## **8. KANSAI TAPPET MARKET OUTLOOK**

### 8.1. Market Size & Forecast

#### 8.1.1. By Value

### 8.2. Market Share & Forecast

#### 8.2.1. By Type Share Analysis

#### 8.2.2. By Engine Capacity Market Share Analysis

#### 8.2.3. By Vehicle Type Market Share Analysis

8.2.4. By Distribution Channel Market Share Analysis

## **9. CHUGOKU TAPPET MARKET OUTLOOK**

9.1. Market Size & Forecast

9.1.1. By Value

9.2. Market Share & Forecast

9.2.1. By Type Share Analysis

9.2.2. By Engine Capacity Market Share Analysis

9.2.3. By Vehicle Type Market Share Analysis

9.2.4. By Distribution Channel Market Share Analysis

## **10. SHIKOKU TAPPET MARKET OUTLOOK**

10.1. Market Size & Forecast

10.1.1. By Value

10.2. Market Share & Forecast

10.2.1. By Type Share Analysis

10.2.2. By Engine Capacity Market Share Analysis

10.2.3. By Vehicle Type Market Share Analysis

10.2.4. By Distribution Channel Market Share Analysis

## **11. KYUSHU TAPPET MARKET OUTLOOK**

11.1. Market Size & Forecast

11.1.1. By Value

11.2. Market Share & Forecast

11.2.1. By Type Share Analysis

11.2.2. By Engine Capacity Market Share Analysis

11.2.3. By Vehicle Type Market Share Analysis

11.2.4. By Distribution Channel Market Share Analysis

## **12. MARKET DYNAMICS**

12.1. Drivers

12.2. Challenges

## **13. MARKET TRENDS & DEVELOPMENTS**

## **14. PORTERS FIVE FORCES ANALYSIS**

## **15. COMPETITIVE LANDSCAPE**

### 15.1. Company Profiles

#### 15.1.1. Otis Corporation

##### 15.1.1.1. Company Details

##### 15.1.1.2. Products

##### 15.1.1.3. Financials (As Per Availability)

##### 15.1.1.4. Key Market Focus & Geographical Presence

##### 15.1.1.5. Recent Developments

##### 15.1.1.6. Key Management Personnel

#### 15.1.2. NSK Ltd.

#### 15.1.3. Schaeffler AG

#### 15.1.4. Federal-Mogul LLC.

#### 15.1.5. Rane Engine Valve Limited

#### 15.1.6. Wuxi Xizhou Machinery Co. Ltd.

#### 15.1.7. AC Delco

#### 15.1.8. TRW

#### 15.1.9. Competition Cams, Inc.

#### 15.1.10. SKF

## **16. STRATEGIC RECOMMENDATIONS**

## **17. ABOUT US & DISCLAIMER**

## I would like to order

Product name: Japan Tappet Market By Type (Flat, Roller), By Engine Capacity (<4 Cylinders, 4–6 Cylinders, >6 Cylinders), By Vehicle Type (Passenger Cars, Commercial Vehicle), By Distribution Channel (OEM, Replacement), By Region, Competition, Opportunities & Forecast, 2020-2030F

Product link: <https://marketpublishers.com/r/J8FD0C3E0AC1EN.html>

Price: US\$ 3,500.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
