Abstracts

Market Overview

The Global Maternal Mental Health Market was valued at USD 5.83 billion in 2024 and is projected to reach new growth levels by 2030, expanding at a CAGR of 9.23%. Maternal mental health, encompassing conditions such as postpartum depression, anxiety, and PTSD, is increasingly recognized as a public health priority. These mental health challenges can arise during pregnancy or the postpartum period and have serious implications for both mother and child, including premature birth and developmental issues. Rising awareness, the normalization of seeking help, and improved access to mental healthcare services are contributing to the market's growth. Additionally, healthcare providers and policy makers are implementing more comprehensive screening and treatment strategies. Technological advancements, including mobile health apps, wearable monitoring devices, and AI-powered analytics, are also playing a pivotal role in early detection and personalized intervention. The increasing global birth rate, coupled with heightened awareness and support infrastructure, is expected to fuel robust growth in the maternal mental health market.

over the coming years.

Key Market Drivers

High Prevalence of Maternal Mental Health Disorders is Driving Global Maternal Mental Health Market

The increasing recognition of the prevalence and impact of perinatal mental health disorders is a primary driver for the market. Conditions such as postpartum depression, general anxiety, and PTSD are now known to affect a substantial proportion of women during and after pregnancy. Studies indicate that up to one in seven women in the U.S. experience postpartum depression, with other regions reflecting similarly high rates. The COVID-19 pandemic further intensified maternal mental health concerns, with research from the University of Michigan highlighting that nearly one in three mothers during early 2020 experienced symptoms of depression. This growing awareness has encouraged greater demand for mental health services tailored specifically to the maternal population. Healthcare systems, non-profits, and governments are increasingly supporting maternal mental health programs, while tech firms and pharmaceutical companies are innovating around treatment and support tools, further driving market expansion.

Key Market Challenges

Stigma and Awareness

One of the major obstacles hindering market growth is the persistent stigma surrounding mental health during and after pregnancy. Many women feel pressured to conform to societal expectations that motherhood should be a purely joyful experience, leading to feelings of guilt or fear of judgment if they disclose emotional distress. As a result, many mothers delay or avoid seeking treatment altogether. Compounding this issue is the lack of consistent mental health screening in prenatal and postpartum care. To combat these barriers, efforts must focus on awareness campaigns, caregiver training, and integration of mental health checks into routine maternal care. Destigmatizing maternal mental health through education and supportive community platforms remains essential to unlocking further growth in the market.

Key Market Trends

Technological Advancements

Technology is playing a transformative role in the maternal mental health market. The rise of telehealth has made it easier for women to access care from the safety and privacy of their homes. Mobile apps designed for mood tracking, meditation, and personalized support are becoming more prevalent, offering scalable and accessible mental health solutions. Wearable technologies also support continuous monitoring of vital signs and stress indicators, enabling early detection of mental distress. Artificial Intelligence is being used to analyze behavioral and physiological data, helping predict mental health risks and guide timely interventions. Moreover, Virtual Reality is emerging as a therapeutic tool for treating postpartum anxiety and PTSD by offering immersive relaxation and exposure therapy experiences. Collectively, these technological developments are helping to reduce barriers to care, improve treatment personalization, and enhance patient engagement.

Key Market Players

Therapy Mama

Canopie

Pfizer Inc

Viatis Inc.

GlaxoSmithKline Inc.

Alembic Pharmaceuticals Limited

Mallinckrodt Inc.

Sage Therapeutics, Inc.

Bausch Health Companies Inc.

Magellan Health, Inc.

Report Scope:

In this report, the Global Maternal Mental Health Market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

Maternal Mental Health Market, By Disease Indication:

Postpartum Depression

Dysthymia

Pregnancy and Postpartum General Anxiety

Pregnancy and Postpartum OCD

Birth-Related PTSD

Others

Maternal Mental Health Market, By Therapy:

Interpersonal Psychotherapy

Antidepressants

Cognitive Behavioral Therapy

Others

Maternal Mental Health Market, By Region:

North America

United States

Canada

Mexico

Europe

France

United Kingdom

Italy

Germany

Spain

Asia-Pacific

China

India

Japan

Australia

South Korea

South America

Brazil

Argentina

Colombia

Middle East & Africa

South Africa

Saudi Arabia

UAE

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in the Global Maternal Mental Health Market.

Contents

1. PRODUCT OVERVIEW

- 1.1. Market Definition
- 1.2. Scope of the Market
 - 1.2.1. Markets Covered
 - 1.2.2. Years Considered for Study
 - 1.2.3. Key Market Segmentations

2. RESEARCH METHODOLOGY

- 2.1. Objective of the Study
- 2.2. Baseline Methodology
- 2.3. Key Industry Partners
- 2.4. Major Association and Secondary Sources
- 2.5. Forecasting Methodology
- 2.6. Data Triangulation & Validation
- 2.7. Assumptions and Limitations

3. EXECUTIVE SUMMARY

4. VOICE OF CUSTOMER

5. GLOBAL MATERNAL MENTAL HEALTH MARKET OUTLOOK

- 5.1. Market Size & Forecast
 - 5.1.1. By Value
- 5.2. Market Share & Forecast
 - 5.2.1. By Disease Indication (Postpartum Depression, Dysthymia, Pregnancy and Postpartum General Anxiety, Pregnancy and Postpartum OCD, Birth-Related PTSD, Others)
 - 5.2.2. By Therapy (Interpersonal Psychotherapy, Antidepressants, Cognitive Behavioral Therapy, others)
 - 5.2.3. By Region
 - 5.2.4. By Company (2024)
- 5.3. Market Map

6. NORTH AMERICA MATERNAL MENTAL HEALTH MARKET OUTLOOK

6.1. Market Size & Forecast

6.1.1. By Value

6.2. Market Share & Forecast

6.2.1. By Disease Indication

6.2.2. By Therapy

6.2.3. By Country

6.3. North America: Country Analysis

6.3.1. United States Maternal Mental Health Market Outlook

6.3.1.1. Market Size & Forecast

6.3.1.1.1. By Value
