Abstracts

MEA Acetone demand stood at 0.40 Million Tonnes in 2020 and is forecast to reach 0.58 Million Tonnes by 2030, growing at a healthy CAGR of 3.80% until 2030. The growth can be attributed to the massive consumption of Acetone as a feedstock and cost-effective solvent across various end-user industries. Besides, the rising adoption of Acetone in the alcoholic beverage industry owing to changing lifestyle of people supported by the increase in their capital income is adding to the growth of the Acetone market during the forecast period. Moreover, rising investments from key players for enhancing the capacity of Acetone derivatives are likely to grow the consumption of Acetone in MEA.

The COVID-19 pandemic caused major disruptions in supply chains and put a temporary halt on the production activities, which led to lesser demand for Acetone in the region. However, the exponential requirement for Acetone in pharmaceutical industries along with the rising adoption of hygiene products as a safety measure is contributing to the market growth of Acetone in the MEA region.
