## **Abstracts**

MEA Bisphenol S demand stood at 0.00 Million Tonnes in 2020 and is forecast to reach 0.004 Million Tonnes by 2030, growing at a healthy CAGR of 8.12% until 2030. Demand for Bisphenol S is anticipated to grow at a steady pace during the forecast period due to the growing consumption of thermal paper in POS at retail stores coupled with the increasing importance of labeling in the food & beverage industry. Besides, the expanding construction sector is projected to generate demand for solid epoxy resin and thereby increasing the demand for Bisphenol S in the region. Additionally, the rising adoption for Bisphenol S derivatives including phenolic resins and polyurethanes for their extensive use in industries such as paints and coatings, adhesives, and electrical components are driving the market growth. The COVID-19 pandemic caused major disruptions in sales of paints and coatings, construction and industrialization activities, that caused declined demand for bisphenol S. However, the chemical market is bouncing back with increased commercialization activities and rising demand for the eco-friendly material across various end-user industries.
