Abstracts

MEA Ethyl Vinyl Acetate chemicals demand stood at 0.32 Million Tonnes in 2020 and is forecast to reach 0.47 Million Tonnes by 2030, growing at a healthy CAGR of 4.01% until 2030. The growing demand for Ethylene Vinyl Acetate (EVA) in the Middle East and Africa can be attributed to the rising demand for the chemical in the footwear industry. With the growing population and per capita income, the demand for comfortable and expensive footwear products has increased. Also, the demand for packaged goods has expanded exponentially with the increasing e-commerce activities and growing urban population. Besides, the increasing demand of EVA from the packaging industry and rising usage of the chemical in the solar power sector??? are likely to drive Ethyl Vinyl Acetate chemicals market growth during the forecast period.

The COVID-19 outbreak led to a major disruption in the regional economy, which negatively impacted the EVA chemical market. However, as the world is slowly recovering from the pandemic effects, there has been a rise in industrialization and commercial activities, which is likely to propel the Middle East and Africa Ethylene Vinyl Acetate (EVA) market during the forecast period.
