Abstracts

According to “Middle East & North Africa Battery Market By Type, By Application, By Country, Competition Forecast & Opportunities, 2013 – 2023” battery market is projected to reach \$ 4.48 billion by 2023, predominantly on the back of increasing vehicle fleet size and growing demand for premium cars in the region. Increasing penetration of lithium-ion batteries, owing to growing focus of the governments across the region to promote the use of electric vehicles and energy storage solutions in renewable based power sector, is driving the demand for batteries in the region during forecast period. Moreover, expanding 5th Generation based telecommunication network and implementation of Vision Documents in Saudi Arabia, UAE, Qatar and Kuwait are likely to further aid the Middle East & North Africa battery market in the coming years. Some of the major players operating in Middle East & North Africa battery market are ACDelco Inc., Johnson Controls, SEBANG Global Battery Co. Ltd., ATLASBX Co., Ltd., GS Yuasa Corporation, Panasonic Corporation, EnerSys, Energizer Holdings Inc., SAFT Groupe S.A., Chloride Egypt, and Exide Technologies, among others. “Middle East & North Africa Battery Market By Type, By Application, By Country, Competition Forecast & Opportunities, 2013 – 2023” discusses the following aspects of Battery market in Middle East & North Africa:

Battery Market Size, Share & Forecast

Segmental Analysis – By Type (Lead Acid, Lithium-ion, Nickel-Based & Alkaline Flow), By Application (Industrial, Automotive, Electronics, Inverter/ESS &

Others), By Country

Competitive Analysis

Changing Market Trends & Emerging Opportunities

Why You Should Buy This Report?

To gain an in-depth understanding of Battery in Middle East & North Africa

To identify the on-going trends and anticipated growth in the next five years

To help industry consultants, Battery distributors and other stakeholders align their market-centric strategies

To obtain research-based business decisions and add weight to presentations and marketing material

To gain competitive knowledge of leading market players

To avail 10% customization in the report without any extra charges and get the research data or trends added in the report as per the buyer's specific needs

Report Methodology

The information contained in this report is based upon both primary and secondary research. Primary research included interaction with Battery distributors and industry experts. Secondary research included an exhaustive search of relevant publications like company annual reports, financial reports and proprietary databases.
