Abstracts

North America Hydrogen Peroxide demand stood at 0.80 Million Tonnes in 2020 and is forecast to reach 1.2 Million Tonnes by 2030, growing at a healthy CAGR of 4.85% until 2030. The pulp and paper industry drives a majority of the region's Hydrogen Peroxide demand, followed by the electronics and semiconductor industry wherein the chemical is used as a wetting agent during the processing of semiconductor wafers. Owing to the strong demand for Hydrogen Peroxide in the region, the key stakeholders in North America are planning to expand their existing Hydrogen Peroxide plant capacities in the upcoming years making huge investments. Besides, rising demand for hydrogen peroxide for aseptic packaging, pulp bleaching, and wastewater management is also fuelling North America Hydrogen Peroxide market growth. The COVID-19 outbreak exploded the demand for hydrogen peroxide due to the increasing need for sanitization as well as the rising adoption of the chemical in pharmaceutical and healthcare facilities.

The USA holds the largest market share in North America Hydrogen Peroxide market due to the strong presence of top industry players in the region and increasing consumer spending of the population. Digitalization can restrict the use of hydrogen peroxide in the pulp and paper industry due to less consumption of paper, which can hamper the hydrogen peroxide market growth.
