Abstracts

North America Methanol demand stood at 13.52 Million Tonnes in 2020 and is forecast to reach 20.86 Million Tonnes by 2030, growing at a healthy CAGR of 4.35% until 2030. The rising demand for Methanol in North America can be attributed to its increasing adoption across various end-use industries like chemical and petrochemicals, automotive, construction, paints and coatings, etc. Methanol is considered a safer fuel for the environment due to its low evaporation rate and radiant heat. Since Methanol is biodegradable, the chemical is preferred as an ideal replacement for petrochemical derivatives that are toxic and lead to global warming. Besides, enhanced versatility and cost-effectiveness make Methanol a viable alternative to crude oils, which provide the chemical broader growth aspects during the forecast period.

Although the demand for the methanol deteriorated with the onset of the COVID-19 pandemic owing to lockdown restrictions, less mobility, global recession, shutting down of industries, etc., the North America Methanol market bounced back in late 2020 with the increasing demand for the chemical to resume manufacturing options. Besides, the growth of infrastructural development activities is also contributing to the North America Methanol market during the forecast period. The growing inclination of industries towards the use of fuels safe for the environment is likely to add to the growth of the North America Methanol market.

Under this subscription, you would be able to access North America Methanol market demand and supply analysis on a cloud-based platform for one year. The data is updated on a near real-time basis to add any new movement in the industry including,

but not limited to new plant announcements, plant shutdowns, temporary disruptions in demand or supply, news and deals, and much more specific to Methanol.

Years Considered for Analysis:

Historical Years: 2015 – 2019

Base Year: 2020

Estimated Year: 2021

Forecast Period: 2022 – 2030

This report will be delivered on an online digital platform with a one-year subscription and quarterly update.

Deliverables

Installed Capacity By Company:

Installed capacity at a regional level along with the individual capacity of leading players

Installed Capacity By Location:

Installed capacity at country level

Installed Capacity By Process:

Installed capacity by different processes

Installed Capacity By Technology:

Installed capacity by different technologies being used to produce Methanol

Production By Company: Actual production done by different companies

Operating Efficiency Company:

Operating efficiency at which different companies are operating their plants

Demand By End Use: Demand/Sale of Methanol in different end-user industries across the region

Demand By Sales Channel:

Demand/Sale of Methanol by different sales channels across the region

Demand By Country: Demand/Sale of Methanol in different countries of the region- United States, Mexico, Canada, Rest of North America

Demand & Supply Gap: Demand & Supply Gap at the regional level

Market Share of Leading Players:

Revenue shares of leading players in the region

News & Deals: Historical & Current News & Deals in the Methanol market

To extract data for the North America Methanol market, the ChemAnalyst team conducts primary research surveys with Methanol manufacturers, suppliers, distributors, wholesalers, and customers, followed by exhaustive secondary research to cross-validate the information being collected through primary research surveys.
