Abstracts

The Russian LPG industry demand stood at 4.25 Million Tonnes in 2020 and is forecast to reach 9.22 Million Tonnes by 2030, growing at a healthy CAGR of 6.96%% until 2030. In Russia, LPG has been the most common motor fuel and LPG producers have reported a strong surge in demand from the automotive sector. The Russian LPG industry is likely to grow remarkably in the forecast period, further supported by the country's strong investments in the petrochemicals sector. The demand for LPG subsided during the COVID-19 period due to the decline in demand from the commercial sectors. The temporary closure of several end-user industries contributed to lower demand for LPG in Russia. So, the market players started delivering LPG gas to other countries to ensure market growth.
