Abstracts

Saudi Arabia catering services market was valued at USD5.99 billion in 2021 and is expected to grow at a CAGR of 6.91% during the forecast period. The market's growth can be attributed to several factors such as the inflating popularity of fusion cuisine on menus in Saudi Arabia on account of the developing multi-cultural society and the presence of a considerable number of ex-pats across the country. With this, the expanding working population across Saudi Arabia is further stimulating the growth for catering services market. Also, the rising construction of commercial buildings, schools, hospitals, and IT parks has augmented the expansion of catering services industry, which is expected to support the catering services market in the forthcoming years.

People across the country started paying greater attention to their health and inclined towards more nutritional and healthy food when the novel coronavirus affected their immune systems.
