## **Abstracts**

Saudi Arabia Connected Car Market has shown growth in the past years, and it is anticipated to increase at a high rate in the forecast year 2023-2028. With connectivity on wheels, connected cars offer comfort, performance, security, and safety. With the help of such cutting-edge technology in connected cars, the driver and the passengers can connect with numerous web platforms that make real-time communication possible while they are driving. The Saudi Arabia-connected car market is expected to develop as a result of rising consumer demands, an ongoing need for connectivity, improved technology dependability, and an increase in the number of technology enthusiasts. For instance, mm-Wave 5G is being implemented in Europe and China for a limited number of specialized use cases with the intention of making it a standard technology by 2022. Similarly, more than 600 million people will have 5G subscriptions by the end of 2022, predicts Ericson. Similar to how new technologies such as artificial intelligence and machine learning are influencing companies of all sizes. Therefore, the development of 5G and AI technology is expected to fuel the market for connected cars.
