Abstracts

Saudi Arabia Dental Bone Graft Substitute Market is anticipated to witness impressive growth during the forecast period. This can be ascribed to the upgradations in bone graft replacement technology along with growing healthcare expenditure in the developing region. Additionally, the growing adoption of advanced technology for the diagnosis of oral diseases and government organizations to initiate a campaign for preventing oral diseases and educating the people about maintaining oral hygiene have significantly increased the demand for dental bone graft substitutes across different parts of the region. Additionally, the flourishing healthcare industry in the country is expected to increase the demand for dental bone graft substitutes, thereby fuelling market growth through 2028. Furthermore, increasing research for developing new products with low cost is further expected to increase the demand for dental bone graft

substitutes, thereby supporting market growth.

Besides, increasing disposable income and rising outpatient healthcare expenditure is further expected to drive the market growth. Additionally, the growing prevalence of different oral problems among the population is further expected to fuel market growth during the forecast period. In Saudi Arabia, 70% of children in primary schools had caries of their permanent dentition, while 80% of them had dental caries cavities in their primary dentition.

Furthermore, the increasing availability of different products offered by key players in the market is further expected to create lucrative opportunities for market growth. Also, the increasing number of dentists offering different procedures is further expected to support the market growth in the country. Besides, the growing popularity of dental implant surgery in the country is further supporting the market growth.

Increasing Geriatric Population

The growing aging population, which is susceptible to tooth loss and different types of dental problems such as periodontal diseases, root caries, and enentulous, is expected to increase the demand for dental bone graft substitutes. According to Saudi Arabia General Authority for Statistics, in 2019, the elderly population was estimated to be around 2.4% of the country's total population. Additionally, the demand for better oral health care, including teeth whitening, bonding, and inlays, among others, are different ways where dentists improve the lives of patients through oral cosmetic dentistry, this in turn expected to create a lucrative growth of the dental bone graft substitute market during the forecast period.

Growing Awareness About Oral Diseases

Growing awareness among the population to maintain oral health and hygiene because of the increasing prevalence of dental issues like dental carries and tooth decay, among others, is expected to drive the growth of the dental bone graft substitutes market in the country. Also, increasing awareness related to preventive care is further expected to fuel market growth.
