Abstracts

The hydrogen Peroxide industry in Saudi Arabia stood at 30.81 Thousand Tonnes in 2020 and is forecast to reach 54.72 Thousand Tonnes by 2030, growing at a healthy CAGR of 5.62% until 2030. Consumption of Hydrogen Peroxide as a powerful oxidizing and bleaching agent in versatile applications has registered strong growth in the past few years. Saudi Arabia is heavily investing in ramping up its Hydrogen Peroxide capacity to support the downstream Propylene Oxide (PO) manufacturing which is the main ingredient for the production of Polyurethane foams. Looking at its vast market potential in the country, the world's leading peroxide manufacturers are eyeing capacity additions in Saudi Arabia in the coming four years.

The outbreak of COVID-19 in 2020 disrupted the world economy. The market growth was affected drastically, and production units shut down. Furthermore, the major market players intentionally halted the production keeping their employees' health and wellness in mind. With imposed new regulations of the COVID-19 and proper precautions, the market is anticipated to regain its growth in the years to come. Once the market regains the full function of its production unit, the market is bound to show robust growth in the forecast period. Potential investment in the market is expecting steady growth in the market in the forecast period, until 2030.
