Abstracts

Saudi Arabia respiratory care devices market is bound to experience impressive growth with anticipated CAGR in the forecast period, 2023-2027, on the account of prevailing instances of respiratory disorders. A rapidly increasing number of chronic diseases related to the pulmonary system in people is further anticipated to drive the growth of the Saudi Arabia respiratory care devices market in the upcoming five years.

Respiratory care devices are the medical tools and equipment that are utilized for diagnosis, treatment, surgeries, and post-surgery procedures. Patients who are suffering from a pulmonary ailment like chronic obstructive pulmonary disease (COPD), respiratory failures, cardiovascular diseases, etc. require utilization of the respiratory care devices to identify, assess, treat, and maintain their conditions. Medical devices like nebulizers, inhalers, positive airway pressure pumps, spirometers, humidifiers, etc. are all various kinds of respiratory care devices that are required to identify and treat respiratory conditions.

The sedentary lifestyle of the Population Drives Market Growth

Increasing instances of poor choices of lifestyle are driving the growth of the Saudi Arabia respiratory care devices market in the upcoming five years. The young adult population of the country is highly inclined toward smoking and drinking habits. Increased alcoholism among the population is also responsible for the increasing respiratory failure in the population. In 2020, 52.3% of the adult population in the Kingdom of Saudi Arabia is involved in tobacco smoking. School students are also rapidly adapting to such habits and account for 29.8% of the smoking population in the country.

Teenagers as young as 15 years old are involved in alcohol consumption in the country. With the increasing influence of social media and increased notions of presenting themselves as the trendy and globalized population, many young teenagers and young adults are consuming alcohol. Although the country has strict regulations against alcohol consumption, the illegal sale of alcohol and consumption is creating severity of the situation, which is causing increased instances of diseases like lung cancer, liver cancer, etc. along with increasing instances of respiratory failures thereby supporting the growth of the Saudi Arabia respiratory care devices market in the future five years.

Globalization & Industrialization Support Market Growth

The country is rapidly evolving its economic structure based on increasing industrialization and globalization. Due to availability of the cheap labor and affordable resources, multiple global giants are setting up their manufacturing units and factories in various regions of the country. Increased production also adds to the pollution quotient of the country. A rapidly increasing number of automobiles, an increasing number of factories, excessive use of electronics, etc. are all aiding the pollution in the country. Increasing pollution is majorly responsible for causing various respiratory disorders and increasing infection instances in the pulmonary tract is further supporting the growth of the Saudi Arabia respiratory care devices market in the forecast years.
