## **Abstracts**

Saudi Arabia Water Tank market is anticipated to grow at a steady CAGR during the forecast period 2024-2028. A water storage tank is a vessel used to keep water for both home and commercial purposes. Tanks for storing water come in a variety of sizes and designs. They may be horizontal, vertical, subterranean, and is composed of stone, concrete, fibreglass, plastic, or any combination of those materials. Common threats to the water tank include corrosion, bacterial development, and leaks.

Large amounts of water may be conveniently stored in water tanks for use in a variety of purposes, including drinking water, irrigated agriculture, fire suppression, chemical manufacture, and food preparation. Polypropylene or polyethylene materials are typically used to make them. Compared to cement tanks, they take up less area on the floor. Polyethylene, steel, or fibre glass are the most common materials used to make water tanks for residential or commercial usage. The tanks can range in size from 200 litres to more than 10,000 litres and are available in different designs.

Saudi Arabia is one of the world's most water-stressed countries. The extreme water shortage threshold is 500 cubic metres per capital, which is why the country's need for water tanks is expected to rise in the next years.

Growing Population and Consumption of Water in the Kingdom

Due to the region's growing population and state-wide water usage as a result of local water sources drying out, the local authority needs big storage tanks to hold the water that is utilised for essential reasons. As a result, as the population grows, the kingdom uses more water, which raises the demand for water and water storage in the nation. Considering the demand of people for water consumption in Saudi Arabia, this is creating a significant volume of water tanks, promoting growth in the water tank market.

### Government Authorities Focusing on Water Conservation.

Since water scarcity becomes major problem in Saudi Arabia, the government has taken crucial steps to overcome water scarcity issues. The government has introduced numerous welfare measures and taken important steps toward implementing water storage in the Kingdom. Given the remote locations, extreme weather conditions, environmental laws, and health and safety issues, it is critical to treat this water properly, efficiently, and consistently. The government is focusing more on water conservation, and local authorities are helping companies build water storage facilities in the area. This is having a positive impact on the expansion of the water tank market.

### Saudi Arabia Water Tank Market Challenges

In Saudi Arabia, the water tank treatment market has challenges such as the high cost of intensive technology, lack of awareness about water tank management, and maintenance of water tanks. The collection of sand or silt in storage tanks is one of the most typical problems connected with storage tanks. This can be reduced in certain circumstances by installing a filter on the storage tank's entrance. However, in many cases, this is more expensive and less feasible than just draining and cleaning the storage tank every few years. The operating cost for installation also could be a major challenge for water tank market affecting the growth rate of the market.

### Market Segments

Saudi Arabia Water Tank Market is divided on the basis of Product, Raw Material, Size and Application. Based on Products, the market is further bifurcated into Plastic, Concrete, Metal, Fiber Glass, and Others. Based on Raw Material, the market is divided into LLDPE (Linear Low-Density Polyethylene), HDPE (High Density Polyethylene), Stainless Steel, Cement, and Others, Based on Size, the market is segmented into Cylindrical, Rectangular, and Others. Based on Application, the market is further segmented into Commercial, Residential, Municipal, and Industrial.

## Market Players

Major market players of Saudi Arabia Water Tank Market are SAWACO Water Company, Al Zamil Industry and Trade Co., National Polyethylene Company, Wataniya Fiber Glass Reinforced Plastic Factory Co. W.L.L, National Water Company, Pipeco Water Tanks Company, Gulf Specialized Works Company, Marjan Factory Company, Ekomaxi Sectional Panel GRP Water Tank Manufacturers, CB&I Storage Solutions, and Jash Technical Services Company.

## Report Scope:

In this report, Saudi Arabia Water Tank Market has been segmented into following categories, in addition to the industry trends which have also been detailed below:

### Saudi Arabia Water Tank Market, By Product:

Plastic

Concrete

Metal

Fiber Glass

Others

### Saudi Arabia Water Tank Market, By Raw Material:

LLDPE

HDPE

Stainless Steel

Cement

Others

### Saudi Arabia Water Tank Market, By Size:

Cylindrical

Rectangular

Others

### Saudi Arabia Water Tank Market, By Application:

Commercial

Residential

Municipal

Industrial

### Saudi Arabia Water Tank Market, By Region:

Western Region

Northern & Central Region

Eastern Region

Southern Region

### Competitive Landscape

**Company Profiles:** Detailed analysis of the major companies present in Saudi Arabia Water Tank Market.

### Available Customizations:

Saudi Arabia Water Tank with the given market data, Tech Sci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

*Saudi Arabia Water Tanks Market by Product (Plastic, Concrete, Metal, Fiber Glass, Others), By Raw Material (L...*
