Abstracts

South Africa Bisphenol S demand stood at 0.28 thousand tonnes in 2020 and is forecast to reach 0.47 thousand tonnes by 2030, growing at a healthy CAGR of 4.72% until 2030. South Africa caters to BPA and BPS demands through imports. The thermal paper in POS is experiencing surged demands and driving the South Africa Bisphenol S market in the forecast period. Growth in thermal paper manufacturing & chemicals production may stimulate the growth of the BPS market in South Africa for the forecast period. Gradual replacement of Bisphenol A by Bisphenol S in the major exporting regions including Europe and North America aids to support the demand rise of Bisphenol S in South Africa. Demand growth from other end-uses includes the growth in epoxy resin demand due to the growing construction. Growth in the construction sector is attributed to the higher spending in the construction sector. This is projected to increase the demand for Bisphenol S as it is an important component in the production of solid epoxy resin which has application in the construction sector. The rising demand for phenolic resins and polyurethanes is expected to rise the demand further for Bisphenol S.

COVID-19 pandemic had a severe impact on the market, in general, and disrupted the economy. Rising number of patients suffering from the infection and rapidly evolving virus created death scare for the whole population at large. The government imposed the lockdown to contain the spread of the virus that further resulted in disabling market growth. The manufacturing units were closed for a significant amount of time, and it disturbed the distribution channels. The government is slowly controlling the consequences, and steadily market is regaining its composure. With a steady CAGR in

the upcoming forecast years, the market may grow and present as a potential investment for the new market player that supports the market growth in the future.
