Abstracts

According to “South Africa Desalination Plant Market By Technology, By Feed Source, By End Use, Competition Forecast & Opportunities, 2013 – 2023”, South Africa desalination plant market’s installed capacity to reach 0.77 million cubic meters per day. Demand for desalination plants is expected to be driven by depleting fresh water sources and groundwater level in several provinces, water shortages due to drought conditions, and growing government investments for constructing desalination plants in Western Cape Province. As seawater is widely used as a source in desalination plants due to its abundant supply and easy conversion, the number of seawater-based desalination plants in South Africa is expected to increase over the coming years. Some of the major players operating in South Africa desalination plant market include Veolia Water Solutions & Technologies South Africa (PTY) Limited, GE Water Technologies (South Africa), GrahamTek Systems, Aveng Water (PTY) Limited, and Proxa Water, among others. “South Africa Desalination Plant Market By Technology, By Feed Source, By End Use, Competition Forecast & Opportunities, 2013 – 2023” discusses the following aspects of desalination plant market in South Africa:
