Abstracts

South Africa Methanol market demand stood at 3566.4 Thousand Tonnes in 2020 and is forecast to reach 5207.03 Thousand Tonnes by 2030, growing at a healthy CAGR of 3.37% until 2030. Since Methanol offers a low evaporation rate and low radiant heat, its consumption in South Africa is augmenting across various industries as a safer process fuel amidst rising environmental concerns. As Methanol is easily biodegradable, it is preferred as an ideal replacement of crude derivatives in industries like chemical and petrochemicals, paints and coatings, automotive, construction, etc. However, due to the onset of the COVID-19 pandemic, the government released a set of precautionary measures and guidelines to contain the spread of novel coronavirus. The demand for Methanol declined as the major end-user industries were shut down. After the COVID-19 period, the market is expected to pick up the pace eventually.
