Abstracts

South America Acetone demand stood at 0.13 Million Tonnes in 2020 and is forecast to reach 0.29 Million Tonnes by 2030, growing at a healthy CAGR of 5.62% until 2030. The rise in demand for Acetone in South America is likely to grow notably in the forecast period due to its strong consumption as a superior solvent in industries like pharmaceuticals, cosmetics, and paints, and coatings owing to its high functionality and affordable cost. Furthermore, growing demand for Acetone derivatives like Bisphenol A and Methyl Methacrylate, supported by rapid industrialization in the region, is anticipated to drive South America market growth during the forecast period.

Due to the COVID-19 pandemic, construction and industrialization came to a standstill, which affected the Acetone market negatively. However, the growing use of Acetone and its derivatives in pharmaceutical industries, owing to the rising use of sanitization and hygiene products as well as increasing health awareness is significantly adding to the South America Acetone market growth.
