## **Abstracts**

South America Biodiesel demand stood at 0.75 Million Tonnes in 2020 and is forecast to reach 1.211 Million Tonnes by 2030, growing at a healthy CAGR of 5.01% until 2030. The rising adoption of biodiesel in the power generation sector due to its high heat capacity and eco-friendly nature is a major driving factor for the South America Biodiesel market. Moreover, strong government support towards the replacement of fossil fuel with biofuel to diversify their oil market, reduce the oil imports from North America and the Middle East, and reduce the greenhouse emissions is propelling demand for biodiesel in the region. Additionally, higher blending targets by the government are also pushing the demand further during the forecast period. High compatibility of biodiesel with the current diesel engines and renewability of resources might ensure that the costs go down during the forecast period, which would affect the South America biodiesel market positively.

Due to lockdown restrictions, travel bans, and halt in production units as a measure to curb the COVID-19 pandemic, the demand for biodiesel declined drastically. However, as the region is slowly recovering from the pandemic effects, there has been a rise in commercial and industrialization activities, which is likely to influence the South America biodiesel market during the forecast period.

Under this subscription, you would be able to access the South America biodiesel market demand and supply analysis on a cloud-based platform for one year. The data is updated on a near real-time basis to add any new movement in the industry including but not limited to new plant announcements, plant shutdowns, temporary disruptions in

the demand or supply, news and deals, and much more specific to biodiesel.

Years Considered for Analysis:

Historical Years: 2015 – 2019

Base Year: 2020

Estimated Year: 2021

Forecast Period: 2022 – 2030

This report will be delivered on an online digital platform with a one-year subscription and quarterly update.

Deliverables:

Installed Capacity By Company-Installed capacity at a regional level along with the individual capacity of leading players

Installed Capacity By Location-Installed capacity at country level

Installed Capacity By Process-Installed capacity by different processes

Installed Capacity By Technology-Installed capacity by different technologies being used to produce biodiesel

Production By Company-Actual production done by different companies

Operating Efficiency Company-Operating efficiency at which different companies are operating their plants

Demand By End Use-Demand/Sale of biodiesel in different end-user industries across the region

Demand By Sales Channel-Demand/Sale of biodiesel by different sales channels across the region

Demand By Country-Demand/Sale of biodiesel in different countries of the region Brazil, Argentina

Demand & Supply Gap-Demand & Supply Gap at the regional level

Market Share of Leading Players-Revenue shares of leading players in the region.

News & Deals Historical & Current News & Deals in the biodiesel market

To extract data for the South America biodiesel market, the ChemAnalyst team conducts primary research surveys with biodiesel manufacturers, suppliers, distributors, wholesalers, and customers, followed by exhaustive secondary research to cross-validate the information being collected through primary research surveys.
