Abstracts

South America Bisphenol S demand stood at 0.00 Million Tonnes in 2020 and is forecast to reach 0.012 Million Tonnes by 2030, growing at a healthy CAGR of 21.31% until 2030. Rising demand for thermal paper with the increasing usage of online billing by the POS machines and increasing labeling in the food and beverage market is contributing to the strong growth for Bisphenol S. Besides, the growing construction sector is expected to increase the demand for Bisphenol S to meet the rising consumption of epoxy resin. Moreover, the rising demand for BPS derivatives across various industries such as paints and coatings, adhesives, electrical and electronics, packaging, and other end-user industries due to their less toxic nature and low-environmental impact is positively affecting the South America Bisphenol S market. The COVID-19 had a drastic impact on every industry, and the chemical sector is no exception. The disrupted supply chain, travel restrictions, and limited mobility of goods and personnel declined the Bisphenol S demand for a short period. However, the South America Bisphenol S market is expected to rebound and grow at a formidable rate during the forecast period due to the growing need for eco-friendly chemicals and rapid industrialization.
