Abstracts

South America Hydrogen Peroxide demand stood at 0.039 Million Tonnes in 2020 and is forecast to reach 0.061 Million Tonnes by 2030, growing at a healthy CAGR of 4.21% until 2030. South America's pulp and paper industry account for more than 40% of the country's total Hydrogen Peroxide demand owing to massive investments by key players across the packaging and paper processing industry. The region is investing heavily in expanding its trade ties with other major Hydrogen Peroxide producers across the world to cater to the rising domestic chemical demand. Hydrogen peroxide is a disinfecting agent that is widely used in the production of sanitizers, disinfectants, and other personal care products. Due to COVID-19, economies in the region were involved in mass sanitization and disinfecting public places as well as private accommodations, which increased the demand for hydrogen peroxide and its derivatives. Besides, rising use of the chemical in pharmaceutical industries is contributing to the Hydrogen Peroxide demand in the region.
