Abstracts

South America Iso Propyl demand stood at 0.08 Million Tonnes in 2020 and is forecast to reach 0.12 Million Tonnes by 2030, growing at a healthy CAGR of 4.39% until 2030. The Iso Propyl Alcohol growth in the region can be attributed to the rising demand for its derivatives such as methyl isobutyl ketone (MIBK), isopropylamines, and isopropyl esters among various end-user industries. Besides, increasing adoption of Iso Propyl Alcohol as an important solvent in alcohol-based hand sanitizers due to growing consumer awareness for personal care and hygiene can further augment the market growth of IPA in the years to come. Besides, growing investments from key stakeholders for capacity expansions and installation of new plants are likely to fuel the South America Iso Propyl Alcohol market over the forecast period. The COVID-19 outbreak led to an exponential demand for Iso Propyl Alcohol due to the rising adoption of sanitizers, disinfectants, and other personal care items, which further increased the demand for the chemical. Besides, the advanced sanitization measures adopted by the government to curb the spread of coronavirus are contributing to the significant growth of the South America Iso Propyl Alcohol market during the forecast period.
