Abstracts

The Global Surgical Scissors Market is anticipated to witness impressive growth during the forecast period. This can be ascribed to the rising surgical procedure in dermatology and chronic diseases like cancer. Additionally, the growing demand for both plastic surgery for long hours and small surgical scissors for detailed and precise procedures has significantly increased the demand for surgical scissors worldwide. Additionally, the growing geriatric population across the globe, which is susceptible to different kinds of chronic diseases, is further expected to increase the demand for surgical scissors, thereby fuelling market growth through 2028. Besides, the growing development of different surgical scissors based on their diverse uses by leading companies is further expected to support the surgical scissors market during the forecast period.

Furthermore, the growing prevalence of different types of injuries, such as burn injuries and sports injuries, is further expected to increase the demand for surgical scissors, thereby supporting market growth. Additionally, according to the Centres for Diseases Control and Prevention, in 2020, about 600,000 women in the United States had a hysterectomy every year, about 460,000 United States residents had a cholecystectomy, and 1.3 million pregnant women sought C-sections in the United

States.

Increasing Demand for Minimally Invasive Surgical Procedures

Different factors are influencing the growth of the market, such as the increasing demand for minimally invasive surgical procedures because of the increasing prevalence of chronic diseases like cancer, cardiovascular diseases, obesity, and arthritis across the globe. Similarly, increasing road accidents and rising hospitalization rates are further expected to boost the growth of the market during the forecast period. Increasing usage of durable and efficient surgical scissors is enhancing the demand for surgical scissors across the world as minimally invasive surgical (MIS) techniques and sophisticated surgical methods gain popularity. This, in turn, will boost the market growth over the years. Additionally, the emergence of improved surgical scissors with greater strength and adaptability also improves market growth in the future. The National Highway Traffic Safety Administration, a division of the Department of Transportation, estimated 42,915 people died in motor vehicle traffic crashes in 2021, which was a 10.5% increase from the 38,824 fatalities in 2020.

Growing Advancement in Surgical Procedure

Presently, major market players are investing in developing surgical scissors with strong, adaptable materials to improve their usefulness while creating new scissors with eye rings by utilizing computer-aided modeling. These product advancements are expected to create lucrative growth in the forecast period. According to the American College of Cardiology in the U.S., in 2019, coronary surgeries are estimated to occur in about 1,055,000 individuals, including 720,000 new and 335,000 recurrent coronary surgeries. Additionally, increasing demand for cost-effective and robust surgical instruments along with the geriatric population being more susceptible to different types of diseases undergoing surgical procedures are the major factors expected to create demand for surgical scissors, in turn, create significant growth during the forecast period. This year, an estimated 268,490 men in the United States will be diagnosed with prostate cancer.

Market Segmentation

The global surgical scissors market can be segmented by type, material type, application, end-user, and by region. Based on type, the market can be divided into Reusable v/s Disposable. Based on material type, the market can be differentiated into Tungsten, Stainless Steel, Titanium, Ceramic, and Others. Based on application, the

market can be grouped into Cardiology, Orthopedics, Gastroenterology, Dermatology, Neurology, and Others. Based on end users, the market can be segmented into Hospitals & Clinics, Ambulatory Care Centers, and Others. Regionally, North America dominated the market among Asia Pacific, Europe, Middle East & Africa, and South America. Among the different countries, the United States dominated the global surgical scissors market on account of the growing demand for minimally invasive procedures in the country.

Recent Development

In October 2021, Grundfos introduced its LC232 Controller, a new groundwater pump controller which helps to advance smart agriculture in four markets in the Asia Pacific region – Indonesia, Thailand, Australia, and New Zealand.

In August 2019, Ace Pumps Corporation launched three new pumps featuring the company's popular 206 motor and built-in pulse width modulated (PWM) control valves. The modulated control valves allow equipment owners and operators to implement a PWM control regimen on pull-type sprayers, planters, and fertilizer applicators.

Market Players

Becton, Dickinson, and Company, Stryker Corporation, B.Braun Melsungen AG, Teleflex, Inc., Olympus Corporation, Arthrex, Inc., Encision Inc., Scanlan International, Inc., World Precision Instruments, Inc., Richard Wolf GmbH are some of the leading players operating in the Global Surgical Scissors Market.

Report Scope:

In this report, global surgical scissors market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

Surgical Scissors Market, By Type:

Reusable

Disposable

Surgical Scissors Market, By Material Type:

Tungsten

Stainless Steel

Titanium

Ceramic

Others

Surgical Scissors Market, By Application:

Cardiology

Orthopedics

Gastroenterology

Dermatology

Neurology

Others

Surgical Scissors Market, By End Users:

Hospitals & Clinics

Ambulatory Care Centers

Others

Surgical Scissors Market, By Region:

North America

United States

Canada

Mexico

Europe

France

Germany

United Kingdom

Italy

Spain

Asia Pacific

China

India

Japan

South Korea

Australia

South America

Brazil

Argentina

Colombia

Middle East & Africa

South Africa

Saudi Arabia

UAE

Turkey

Egypt

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in Global Surgical Scissors Market.

Available Customizations:

With the given market data, TechSci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

Company Information

Detailed analysis and profiling of additional market players (up to five).

Contents

1. PRODUCT OVERVIEW

- 1.1. Market Definition
- 1.2. Scope of the Market
 - 1.2.1. Markets Covered
 - 1.2.2. Years Considered for Study
 - 1.2.3. Key Market Segmentations

2. RESEARCH METHODOLOGY

- 2.1. Objective of the Study
- 2.2. Baseline Methodology
- 2.3. Key Industry Partners
- 2.4. Major Association and Secondary Sources
- 2.5. Forecasting Methodology
- 2.6. Data Triangulation & Validation
- 2.7. Assumptions and Limitations

3. EXECUTIVE SUMMARY

- 3.1. Overview of the Market
- 3.2. Overview of Key Market Segmentations
- 3.3. Overview of Key Market Players
- 3.4. Overview of Key Regions/Countries
- 3.5. Overview of Market Drivers, Challenges, Trends

4. VOICE OF CUSTOMER

5. GLOBAL SURGICAL SCISSORS MARKET OUTLOOK

- 5.1. Market Size & Forecast
 - 5.1.1. By Value & Volume
- 5.2. Market Share & Forecast
 - 5.2.1. By Type (Reusable v/s Disposable)
 - 5.2.2. By Material Type (Tungsten, Stainless Steel, Titanium, Ceramic, Others)
 - 5.2.3. By Application (Cardiology, Orthopedics, Gastroenterology, Dermatology, Neurology, Others)

- 5.2.4. By End User (Hospitals & Clinics, Ambulatory Care Centers, Others)
- 5.2.5. By Region
- 5.2.6. By Company (2022)
- 5.3. Market Map
 - 5.3.1. By Type
 - 5.3.2. By Material Type
 - 5.3.3. By Application
 - 5.3.4. By End User
 - 5.3.5. By Region

6. NORTH AMERICA SURGICAL SCISSORS MARKET OUTLOOK

- 6.1. Market Size & Forecast
 - 6.1.1. By Value & Volume
- 6.2. Market Share & Forecast
