Abstracts

Taiwan Iso Propyl Alcohol market stood at 7.48 Thousand Tonnes in 2020 and is forecast to reach 9.95 Thousand Tonnes by 2030, growing at a healthy CAGR of 2.85% until 2030. The factor most responsible for driving the country's IPA market is the surging demand for the solvent in disinfectants and consumer-driven products. The paints and coats sector which forms a significant slice of the IPA consumption in Taiwan is likely to accelerate the market growth owing to massive investments across the construction and automotive sector.

World economy was disrupted due to the outbreak of COVID-19 in 2020. The market was affected drastically, and production and manufacturing units were shut down. Furthermore, the major market players intentionally halted the production keeping their employee's health and wellness in mind. Although, the market experienced a surge in demand for isopropyl alcohol due to its use in the production of end products like hand sanitizers, disinfectants, etc. With imposed new regulations of the COVID-19 and proper precautions, the market is anticipated to regain its growth in the years to come. The pandemic is slowly being subsided and the effects are tried to be overcome by various methods. Once the market regains the full function of its production unit, the market is bound to show robust growth in the forecast period.
