## Abstracts

Hydrogen Peroxide demand in Thailand stood at 35.44 Thousand Tonnes in 2020 and is forecast to reach 61.14 Thousand Tonnes by 2030, growing at a healthy CAGR of 5.15% until 2030. Hydrogen Peroxide is a powerful oxidizing and bleaching agent serving a wide range of industries such as pulp, chemicals, aquaculture, food, mining, wastewater treatment, disinfectants, and textile industries. For years, the country has been strongly investing in ramping up its Hydrogen Peroxide capacity for the production of Propylene Oxide, a key feedstock for a variety of petrochemicals. Leading chemical giant, Solvay Group runs the world's biggest Hydrogen Peroxide plant in Map Ta Phut (Thailand). The outbreak of COVID-19 in 2020 disrupted the world economy. The market growth was affected drastically, and production units shut down. Furthermore, the major market players intentionally halted the production keeping their employees' health and wellness in mind. With imposed new regulations of the COVID-19 and proper precautions, the market is anticipated to regain its growth in the years to come. Once the market regains the full function of its production unit, the market is bound to show robust growth in the forecast period. Potential investment in the market is expecting steady growth in the market in the forecast period, until 2030. For its application in the healthcare industry, disinfectant and cleansing agent production, and food packaging industry the market is expected to grow impressively and overcome the pandemic setback in the forecast period.
